

Public Broadcasters  
Global Media Summit on **HIV/AIDS**  
San Francisco, CA | May 2nd 2005

## Statement of Support

We, the undersigned, recognize that HIV/AIDS threatens the health, security and economic well being of all nations. As media leaders, we realize the unique role we play in helping to stem the spread of this disease. Through our reach and influence, we are a powerful force for educating the public about HIV/AIDS and, thereby, helping to reduce its further spread and the stigma facing those already living with HIV/AIDS.

Therefore, as broadcasters serving in the public interest, we resolve personally, as well as on behalf of our organizations, to use our communications expertise and resources to contribute to changing the course of the pandemic.
