Race, Ethnicity & Medical Care

A Survey of Public Perceptions and Experiences

The Henry J. Kaiser Family Foundation

October 1999

The Henry J. Kaiser Family Foundation, based in Menlo Park, California, is an independent national health care philanthropy and is not associated with Kaiser Permanente or Kaiser Industries.

THE KAISER FAMILY FOUNDATION SURVEY OF RACE, ETHNICITY AND MEDICAL CARE: PUBLIC PERCEPTIONS AND EXPERIENCES

National Topline

Methodology:

The Kaiser Family Foundation Survey of Race, Ethnicity and Medical Care: Public Perceptions and Experiences is based on a national random sample of 3,884 telephone interviews with adults age 18 and over including 1,479 whites, 1,189 African Americans and 983 Latinos. Interviews were completed both in English and Spanish according to the preferences of the respondent. The survey was designed and analyzed by researchers at the Foundation, and conducted by Princeton Survey Research Associates between July 7 and September 19, 1999. The margin of error is +/-3% for results based on the full sample, +/-4% for the subsample of whites, +/-4% for African Americans and +/-6% for Latinos. (Margin of error is large for smaller subsamples of respondents). Note that in addition to sampling error there are other possible sources of measurement error.

Note: VOL means response was volunteered by respondent, not an explicitly offered choice. Some questions were asked of random split-halves of the respondents (referred to as Form 1 and Form 2). An * indicates values of less than one percent, and "n" refers to the actual number of people asked a given question. Percentages are based on weighted data; sample and subsample sizes reflect unweighted counts. Percentages may not total exactly 100% due to rounding.

Q1 I have some questions about issues facing our country today. For each issue I read please tell me if you think it is a major problem facing our country, a minor problem or not a problem at all.

	Major problem	Minor problem	Not a problem at all	(Don't know)	(Refused)
a unemployment					
TOTAL	35%	48	13	3	0

Q21 Now I am going to read you some statements. Please tell me whether you think each statement is true or false.

	True	False	(Don't know)	(Refused)
--	------	-------	-----------------	-----------

a African Americans with heart disease are just as likely as whites who have heart disease to get specialized medical procedures and surgery.

TOTAL	57	37	6	*
WHITE	61	33	6	*
AA	41	56	4	0
LATINO	53	43	4	0

b Whites with HIV or AIDS are more likely than African Americans with HIV or AIDS to get the newest medicines and treatments.

TOTAL	46	44	10	*
WHITE	43	47	10	*
AA	64	29	7	0
LATINO	52	41	7	0

Q22 Earlier you expressed the view that the health care system treats people unfairly based on their race or ethnicity. I am going to read you a series of possible reasons why this is so. For each please tell me whether you think it is a major reason, a minor reason, or not a reason for why the system treats people unfairly based on their race or ethnicity.

Based on those who think health care system treats people unfairly based on race or ethnicity

	Major reason	Minor reason	Not a reason	(Don't know)	(Refused)	
--	--------------	--------------	--------------	--------------	-----------	--

a Most doctors are white, and many do not understand the health care needs and how to treat the illnesses of African Americans, Latinos and other minority groups.

Based on random 1/2 of sample (form 1)

TOTAL	23	38	35	2	1	n=1626
