

# HEALTH INSURANCE COVERAGE IN AMERICA

OCTOBER 2007

2006 DATA UPDATE

## Health Insurance Coverage in America — 2006 Data Update —

This set of tables provides detailed information about health insurance coverage of the U.S. nonelderly population in 2006. They are based on the most current information available—the Census Bureau's March 2007 Supplement to the Current Population Survey (the Annual Social and Economic Supplement). For additional information on the factors that influence whether people have health insurance and information on trends in health insurance coverage, see *The Uninsured: A Primer*.

**Detailed national tables** examine health insurance coverage by key social and economic determinants:

- age
- gender
- family income and poverty levels
- household type
- family work status
- race/ethnicity
- citizenship
- education
- health status.

National tables are provided for the total nonelderly population and the low-income population (<200% of the federal poverty level), with additional separate tables for these subpopulations:

- children
- adults
- adult parents, and
- adults without dependent children.

In addition, two national tables describe health insurance coverage among workers (age 18-64) and examine uninsured workers by these additional factors:

- work status
- business size
- occupation, and
- industry.

**Detailed state-level tables** (based on two-year averages of 2005 and 2006 data) provide the health insurance distributions for each state's total nonelderly population, as well as children, adults, (also parents vs. adults without dependent children) and the low-income population. State uninsured rates for children and adults by poverty level are also provided. Data for all tables were produced by the Urban Institute and the Kaiser Commission on Medicaid and the Uninsured.

# 2006 DATA UPDATE

## TABLES

( ) = Estimate has a large 95% confidence interval of +/- 5.0 - 7.9 percentage points. Estimates with larger margins of error are not provided.

## Table Endnotes

---

**The term family as used in family income, family poverty levels, and family work status, is defined as a health insurance unit (those who are eligible as a group for "family" coverage in a health plan) throughout this report.**

- <sup>a</sup> Nonelderly includes all individuals under age 65.
- <sup>b</sup> Other includes other public insurance (mostly Medicare and military-related). SCHIP is included in Medicaid.
- <sup>c</sup> The 2006 federal poverty level for a family of four was \$20,614.
- <sup>d</sup> Parent includes any person with a dependent child.
- <sup>e</sup> Multigenerational/other families with children include families with at least three generations in a household, plus families in which adults are caring for children other than their own (e.g., a niece living with her aunt).
- <sup>f</sup> Part-time workers were defined as working < 35 hours per week.
- <sup>g</sup> For the first time in 2003, respondents could identify themselves in more than one racial group. Since there is no way of knowing how people who reported more than one race in 2003 previously reported their race, comparisons in health insurance coverage by race/ethnicity cannot be made with earlier years.
- <sup>h</sup> Children includes all individuals under age 19.
- <sup>i</sup> Approximately 1% of children live in households with no adult, three-quarters of whom are 17-18 years old.
- <sup>j</sup> Nonelderly adults includes all individuals aged 19-64.
- <sup>k</sup> Workers includes all workers aged 18-64.
- <sup>l</sup> Worker's income only; does not include income from other family members or other sources.
- <sup>m</sup> Self-employed includes only the self-employed who are working in firms with less than 25 workers.
- <sup>n</sup> A small percentage (<1%) of workers are former military and are included in the "Other Occupations" and "Total Workers" totals.
- <sup>o</sup> Other occupations include the following types of jobs: assistants, clerical workers, technicians, repair workers, artists, entertainers, sports-related workers, service workers, laborers, salespersons, operators (equipment, including drivers), skilled trade workers, and assemblers.
