21. I'm going to read you a short list of measures some people think the federal government should take to help fight AIDS. As I read each, please tell me whether you think the government should make it a TOP priority, an important but not the top priority, a lower priority, or not a priority at all in fighting AIDS? (INSERT. ROTATE.)

Now, I have some questions about different proposals that have been made to help stop the spread of AIDS.

22. One proposal requires mandatory reporting to health officials of the names of people who test positive for HIV. Some people FAVOR mandatory reporting as a way to help health officials learn more about the spread of the disease and make it easier to inform people with HIV about new treatments. Others OPPOSE mandatory reporting because they think the results of a person's HIV test should be private and confidential, and they think it might discourage people from getting tested for HIV if they know the results will be reported to others. Do you favor or oppose such a proposal for mandatory reporting?

23. Another proposal requires health officials to attempt to notify past sexual or needle-sharing partners of people who test positive for HIV. Some people FAVOR contacting past sexual or needle-sharing partners because it allows health officials to alert those who may have been exposed to HIV. Others OPPOSE this policy because they think the results of a person's HIV test should be private and confidential, and they think it might discourage people from getting tested for HIV if they know their former partners might be contacted. Do you favor or oppose such a proposal for partner notification?

24. As you may know, there is a federal law that mandates increased penalties for people who commit crimes against blacks and other minorities out of prejudice against them. Would you favor or oppose a similar federal law that would mandate increased penalties for people who commit hate crimes out of prejudice toward gays and lesbians?

Favor	77

e. A change in policy to allow gays and lesbians to serve openly in the military	53	41	6

26. If you knew a candidate for major political office favored expanding the legal protection for gay rights, would this make you MORE likely or LESS likely to support that candidate, or wouldn't it make much difference?
