January 2009

## VI. List of Tables

- Table A:** Where Do the States Stand: Eligibility, Enrollment and Renewal Procedures, and Cost-Sharing Rules (January 2009)
- Table B:** Expanding Eligibility and Simplifying Enrollment: Trends in Children’s Health Coverage Programs (July 1997 to January 2009)
- Table C:** Expanding Eligibility and Simplifying Enrollment: Trends in Health Coverage for Parents (January 2002 to January 2009)
- Table 1:** State Income Eligibility Guidelines for Children’s Regular Medicaid, Children’s SCHIP-funded Medicaid Expansions and Separate SCHIP Programs
- Table 1A:** Children’s Medicaid and SCHIP: States with Income Eligibility 250 percent of the federal poverty line and Higher: Income Eligibility Levels, Waiting Periods, and Premium Payments for Two Children in a Family of Three (January 2009)
- Table 2:** Length of Time a Child is Required to be Uninsured Prior to Enrolling in Children’s Health Coverage
- Table 3:** Income Thresholds for Jobless and Working Parents Applying for Medicaid
- Table 3A:** Income Thresholds for Working Parents Applying for and Receiving Medicaid
- Table 4:** Selected Criteria Related to Health Coverage of Pregnant Women
- Table 5:** Enrollment: Selected Simplified Procedures in Children’s Regular Medicaid, Children’s SCHIP-funded Medicaid Expansions and Separate SCHIP Programs
- Table 6:** Income Verification: Families are Not Required to Provide Verification of Income in Children’s Regular Medicaid, Children’s SCHIP-funded Medicaid Expansions and Separate SCHIP Programs
- Table 7:** Renewal: Selected Simplified Procedures in Children’s Regular Medicaid, Children’s SCHIP-funded Medicaid Expansions and Separate SCHIP Programs
- Table 8:** Enrollment: Selected Simplified Procedures in Medicaid for Parents, with Comparisons to Children
- Table 9:** Renewal: Selected Simplified Procedures in Medicaid for Parents, with Comparisons to Children
- Table 10:** Premium Payments for Two Children in a Family of Three at Selected Income Levels
- Table 10A:** Effective Annual Premium Payments for Two Children in a Family of Three at Selected Income Levels
- Table 11:** Co-payments for Specific Services in Children’s Health Coverage Programs at Selected Income Levels
- Table 12:** Co-payments for Specific Services in Health Coverage Programs for Parents
- Table 13:** Co-payments for Prescriptions in Children’s and Parents’ Health Coverage Programs

**Table A**  
**Where Do the States Stand: Eligibility, Enrollment and Renewal Procedures, and Cost-Sharing Rules**  
**January 2009**

## **Eligibility**

### *Children*

- 44 states, including DC, cover children in families with income 200 percent federal poverty line or higher
- 19 states, including DC, have authorized or implemented coverage for children in families with income at 300 percent of the federal poverty line or higher
- 47 states, including DC, disregard assets in determining children's eligibility for health coverage
- 16 states, including DC, do not require children to be uninsured for a period of time before they can enroll in Medicaid or SCHIP

### *Parents*

- 18 states, including DC, provide comprehensive coverage to working parents in families with income at 100 percent of the federal poverty line or higher
- 23 states, including DC, disregard assets in determining Medicaid eligibility for parents

### *Pregnant Women*

- 40 states, including DC, cover pregnant women with income at 185 percent federal poverty line or higher
- 44 states, including DC, disregard assets in determining eligibility for a pregnant woman
- 30 states, including DC, have adopted presumptive eligibility for pregnant women
- 15 states have adopted the option to cover unborn children using SCHIP funds

## **Simplified Procedures**

### *Children*

- 48 states, including DC, do not require a face-to-face interview to apply for children's coverage
- 35 of the 39 states with separate SCHIP programs use a single application for both Medicaid and SCHIP (21 of these 39 states use a joint renewal form for the two programs).
- 11 states do not require families to provide verification of their income at enrollment (12 states do not require families to verify income at renewal).
- 14 states have adopted presumptive eligibility for children's Medicaid
- 45 states, including DC, allow children to renew coverage annually, as opposed to more often
- 18 states have adopted 12-month continuous eligibility, guaranteeing children a full year of coverage

### *Parents*

- 31 states, including DC, allow parents and children to apply for health coverage using a single, simplified application
- 41 states, including DC, do not require a face-to-face interview when applying for a parent; 46 states, including DC, do not require an interview for renewing a parent's coverage
- 40 states, including DC, allow parents to renew coverage annually, as opposed to more often

## **Premiums and Co-payments**

### *Children*

- 35 states impose premiums or an enrollment fee in their children's health coverage programs; 9 states charge families with income as low as 101 percent of the federal poverty line
- In states with premiums:
  - + the cost for two children in a family with income of 101% federal poverty line ranges from \$8 to \$15 per month
  - + the cost for families with income at 151% federal poverty line ranges from \$10 to \$86 per month.
  - + the cost for families with income at 201% federal poverty line ranges from \$15 to \$136 per month.
  - + the cost for families with income at 250% federal poverty line ranges from \$18 to \$305 per month.
  - + the cost for families with income at 300% federal poverty line ranges from \$20 to \$262 per month.
  - + the cost for families with income at 350% federal poverty line ranges from \$60 to \$152 per month.
  - + premiums charged in states with Medicaid waivers, i.e. Rhode Island and Wisconsin, may be considerably higher than most other states because premiums may include coverage for a parent.
- 13 states impose "lock-out" periods on children in families that do not pay the required premium, preventing such children from re-entering the program after being disenrolled
- 19 states require co-payments for non-preventive physician visits, emergency room care, and/or in-patient hospital care for children at 200 percent of the federal poverty line
- 24 states require a co-payment for prescription drugs for children

#### Notes on Table B

The numbers in this table reflect the net change in actions taken by states from year to year. Specific strategies may be adopted and retracted by several states during a given year. (M) indicates Medicaid; (S) indicates SCHIP.

1. These data reflect states' eligibility expansions and use of simplification strategies for children's Medicaid (poverty level groups).
2. These data reflect states' eligibility expansions and use of simplification strategies for children's Medicaid (poverty level groups) and SCHIP-funded separate programs, as indicated.
3. In addition, two (2) states, **Massachusetts** and **New York**, financed children's health coverage to this income level using state funds only.
4. Seven (7) states still required telephone interviews; face-to-face interviews were left to county discretion in one state.
5. Thirty-three (33) states had eliminated the face-to-face interview for children applying for Medicaid. Six (6) states eliminated the face-to-face interview only for families using the joint Medicaid/SCHIP application to apply for coverage. No data was collected specifically about separate SCHIP programs.
6. In **Tennessee**, enrollment was closed to some but not all children eligible under the state's Medicaid waiver program.
7. In **Tennessee**, enrollment was closed to some but not all children eligible under the state's Medicaid waiver program. In **Massachusetts**, there was a waiting list for state-financed coverage.
8. The three (3) states that froze enrollment in SCHIP at some time between July 2004 and July 2005 had all reopened enrollment by July 2005.
9. **Utah** froze enrollment in SCHIP as of September 2006. The state reopened enrollment in SCHIP in July 2007. **Georgia** stopped enrolling eligible children in its SCHIP program in March 2007. The state reopened enrollment in July 2007.
10. **Tennessee** and **Missouri** created separate SCHIP-funded programs. **Maryland** replaced its separate SCHIP program with an SCHIP-funded Medicaid expansion.

**Table C**  
**Expanding Eligibility and Simplifying Enrollment:**  
**Trends in Health Coverage for Parents**  
**January 2002 to January 2009**

State Strategies	January 2002	April 2003	July 2004	July 2005	July 2006	January 2008	January 2009

**Notes on Table C**

The numbers in the table reflect the net change in actions taken by states from year to year. Specific strategies may be adopted and retracted by several states during a given year.

1. In **Tennessee**, enrollment was closed to some but not all parents eligible under the state's Medicaid waiver program.
2. In **Tennessee**, enrollment was closed to some but not all parents eligible under the state's Medicaid waiver program. Enrollment was closed in the Medicaid waiver programs in **Oregon** and **Utah** as well.
3. In **Washington**, enrollment was closed under the state-funded program during the survey period, but was open as of July 2004. Enrollment was also closed in **Pennsylvania's** state-funded program.
4. Enrollment is closed in **Oregon's** Medicaid waiver program. In **Utah**, parents may only enroll in the state's waiver program during open enrollment periods. Enrollment is closed in **New Mexico's** Medicaid waiver program. Enrollment is closed to new applicants in **Tennessee's** Medicaid expansion program.
5. In **Pennsylvania**, parents may only enroll in the state-funded program during open enrollment periods. **Washington** relies on a system of "managed enrollment" through which parents who are determined eligible for the program may be required to wait for space to open in the program before being enrolled.

SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, 2009.

## Notes for Table 1

▲ Indicates that a state has expanded eligibility in at least one of its children's health insurance programs between July 2007 and January 2009, unless noted otherwise.

▼ Indicates that a state has reduced eligibility in at least one of its children's health insurance programs between July 2007 and January 2009, unless noted otherwise.

\* An asterisk (\*) indicates that the state has passed legislation to use SCHIP funds to expand its children's health coverage program to 250 percent of the federal poverty line or higher. Due to a federal directive issued August 17, 2007 several of these states have scaled back their expansion, postponed the implementation of the expansion or have changed the way in which the state will fund the expansion. Information about these expansions can be found in Table 1A.

Table presents rules in effect as of January 2009, unless noted otherwise.

1. The income eligibility levels noted may refer to gross or net income depending on the state. Income eligibility levels listed are either for "regular" Medicaid where states receive "regular" Medicaid matching payments or show eligibility levels for the state's SCHIP-funded Medicaid expansion program where the state receives the enhanced SCHIP matching payments for these children. The eligibility level listed is the higher of these two standards.

2. To be eligible in the infant category, a child has not yet reached his or her first birthday. To be eligible in the 1-5 category, the child is age one or older, but has not yet reached his or her sixth birthday. To be eligible in the 6-19 category, the child is age six or older, but has not yet reached their 19<sup>th</sup> birthday.

3. The states noted use federal SCHIP funds to operate separate child health insurance programs for children not eligible for Medicaid. Such programs may provide benefits similar to Medicaid or they may provide a limited benefit package. They also may impose premiums or other cost-sharing obligations on some or all families with eligible children. These programs typically provide coverage through the child's 19<sup>th</sup> birthday.

4. This column indicates whether the state was not enrolling eligible children in SCHIP at any time between July 2007 and January 2009. In **Tennessee**, enrollment under the state's waiver program, called TennCare Standard, is closed to new applicants. The only children currently receiving TennCare Standard are children who lose Medicaid, have no access to insurance, and have family income below 200 percent of the federal poverty line, or who are medically eligible (have a health problem that prevents them from getting health insurance). In 2007 the state created a separate SCHIP program for children in families with income up to 250 percent of the federal poverty line. Eligible children may have access to health insurance but must be uninsured.

5. This column indicates whether the state has adopted the Medicaid option to cover children aging out of foster care, referred to as the Chafee option. In **Arkansas**, a small group of foster care children can continue in their U-18 and Medically Needy Foster Care categories and receive Medicaid until they are 21 years old. In **Florida**, the state amended its state law to extend Medicaid coverage to children aging out of foster care until their 21<sup>st</sup> birthday. Previously, the state only covered children aging out of foster care until their 20<sup>th</sup> birthday. In **Georgia**, a child aging out of IV-E Medicaid can sign a consent form to remain in foster care and receive Medicaid coverage up to 21. **Ohio** and **Wisconsin** adopted this option in January 2008. **New York** adopted this option in January 2009.

6. In **California**, infants born to women on the Access for Infants and Mothers (AIM) program are automatically enrolled in SCHIP unless the child is enrolled in employer-sponsored insurance or no-cost full scope Medi-Cal. The income guideline for these infants, through their second birthday, is 300 percent of the federal poverty line.

7. **Florida** operates two SCHIP-funded separate programs. Healthy Kids covers children ages five through nineteen, as well as younger siblings in some locations. Medi-Kids covers children ages one through four.

8. **Georgia**, **Illinois**, and **New Jersey** cover infants in families with income at or below 200 percent of the federal poverty line who are born to mothers enrolled in Medicaid. **Georgia** and **New Jersey** cover infants not born to Medicaid enrolled mothers in families with income at or below 185 percent of the federal poverty line. **Illinois** covers infants not born to Medicaid-enrolled mothers in families with income at or below 133 percent of the federal poverty line.

9. **Illinois**, **Massachusetts**, **New York** and **Wisconsin** provide state-financed coverage to children with incomes above SCHIP levels. Eligibility is shown in parentheses.

10. **Iowa** passed legislation in 2008 to expand children's eligibility up to 300 percent of the federal poverty line in July 2009 dependent on funding and other federal policy issues.

11. **Kansas** passed legislation in May 2008 that would expand SCHIP eligibility from 200 percent of the federal poverty line to 250 percent of the federal poverty line depending on federal funding and resolution of August 17<sup>th</sup> directive. There would be an 8 month waiting period for the expansion population.

12. **Louisiana** passed legislation in June 2008 to expand to 300 percent of the federal poverty line, but have currently implemented up to 250 percent of the federal poverty line. They also passed legislation to adopt the Chafee option, but implementation has been delayed due to hurricanes. Louisiana created a separate SCHIP program in 2008.

13. **Maine** has not adopted the Chafee option, however the state does cover individuals under 21 at or below 150 percent of the federal poverty line. Children in Maine who age out of foster care can voluntarily choose to remain in foster care while finishing school and can keep their MaineCare coverage.

14. In **Minnesota**, the infant category under "regular" Medicaid includes children up to age 2. Under "regular" Medicaid, income eligibility for infants is up to 275 percent of the federal poverty line, and under SCHIP, eligibility for infants is between 275 percent and 280 percent of the federal poverty line. Under "regular" Medicaid, income eligibility for children ages 2-19 is up to 150 percent of the federal poverty line, and

under the Section 1115 waiver, income eligibility for children in this age group is between 150 and 275 percent of the federal poverty line. The Section 1115 waiver provides coverage for children up to age 21.

15. **Montana** passed Initiative 155 in November 2008 which increases income eligibility in CHIP to 250 percent of the federal poverty line, will offer health coverage to all uninsured Montana children with a sliding scale premium, includes presumptive eligibility, increases the waiting period for children, removes the asset test for children and creates a “single store front” for Medicaid and CHIP. The implementation date is October 2009.

16. In **Nebraska** there is “former ward” coverage for children that continue to finish schooling and extends up to age 21.

17. **Ohio** submitted a state plan amendment to expand their SCHIP-funded Medicaid coverage to children in families up to 300 percent of the federal poverty line. The state hopes to implement this expansion in January 2009, pending CMS approval.

18. **Oklahoma** passed legislation to increase the income eligibility guideline to 300 percent of the federal poverty line under its current section 1115 waiver. However, the currently proposed expansion has been scaled back to 217 percent of the federal poverty line and the future expansion of 218 percent to 300 percent of the federal poverty line is pending further CMS guidance and SCHIP reauthorization.

19. **South Carolina** implemented a separate SCHIP program for children with income between 150 and 200 percent of the federal poverty line in April 2008.

20. For **Tennessee**, the Medicaid figures shown represent the income eligibility guidelines under “regular” Medicaid. Enrollment under the state’s waiver program is closed to new applicants; some children who lose Medicaid can enroll (see footnote 4). In 2007 the state created a separate SCHIP program for children in families with income up to 250 percent of the federal poverty line. Children not eligible for regular Medicaid and children closed out of TennCare Standard who meet the SCHIP income guidelines can enroll in the separate SCHIP program.

21. In **Vermont**, Medicaid covers uninsured children in families with income at or below 225 percent of the federal poverty line; uninsured children in families with income between 226 and 300 percent of the federal poverty line are covered under a separate SCHIP program. Underinsured children are covered under Medicaid up to 300 percent of the federal poverty line. This expansion of coverage for underinsured children was achieved through an amendment to the state’s Medicaid Section 1115 waiver.

22. **West Virginia** has passed legislation to expand SCHIP to 250 percent of the federal poverty line in January 2009 pending approval of their state plan amendment.

23. **Wisconsin** implemented BadgerCare Plus in February 2008. Badgercare Plus has no income limit for children. The state will receive Medicaid reimbursement for children up to 250 percent of the federal poverty line and children with incomes between 251 percent and 300 percent of the federal poverty line are covered with state funds.

**Table 1A**

SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, 2009.

**Notes for Table 1A**

Table presents rules in effect as of January 2009, unless noted otherwise.

1. States noted in this table have passed legislation to expand their children’s coverage programs using SCHIP funds to 250 percent of the federal poverty line and higher. Due to the August 17<sup>th</sup> CMS directive, several of these states have scaled back their expansions, postponed the implementation of the expansion or have changed the way in which the state will fund the expansion. For states in *italics* in this table, the income eligibility limit, waiting period, and premiums noted apply to SCHIP-funded Medicaid expansions, unless noted otherwise. To Be Announced (TBA) indicates that premiums are planned for the state’s expansion, however the amount has not yet been determined. A dash (—) indicates that no premiums are required in the program; “N/A” indicates that subsidized coverage will not be available at this income level.

2. This column indicates the length of time a child will be required to be uninsured prior to enrolling in health coverage under the state’s expansion, sometimes referred to as the waiting period.

3. In **California**, premiums vary based on whether the family uses the discounted community provider health plan. The first amount noted is the premium required under the community provider health plan.
4. **Hawaii** eliminated the premium requirement for children with family income between 250 and 300 percent of the federal poverty line in January 2008.
5. **Illinois** implemented its expansion above 200 percent of the federal poverty line with state funds, however prior to the August 17<sup>th</sup> directive the state planned to use SCHIP funds to cover those children. Illinois has now requested federal approval to cover children up to 300 percent of the federal poverty line using federal funding. The waiting period applies only to children covered under the state-funded expansion.
6. **Indiana, Ohio and Oklahoma** have passed legislation to expand their SCHIP programs to 300 percent of the federal poverty line. However, these states have not moved forward with their expansions.
7. In response to the August 17<sup>th</sup> directive, **Louisiana** scaled back their expansion from 300 percent of the federal poverty line to implementation of a separate SCHIP program to 250 percent of the federal poverty line.
8. **Massachusetts** provides state-financed coverage to children with incomes above SCHIP levels. Eligibility is shown in parentheses. **Massachusetts** requires premiums in children's Medicaid (children under six are exempt) and SCHIP.
9. In **Minnesota**, the infant category under "regular" Medicaid includes children up to age two. Under "regular" Medicaid, income eligibility for infants is up to 275 percent of the federal poverty line, and under SCHIP, eligibility for infants is between 275 percent and 280 percent of the federal poverty line. Under "regular" Medicaid, income eligibility for children ages 2-19 is up to 150 percent of the federal poverty line, and under the Section 1115 waiver, income eligibility for children in this age group is between 150 and 275 percent of the federal poverty line. The Section 1115 waiver provides coverage for children up to age 21. In **Minnesota**, the waiting period and premiums apply only to children covered under the Medicaid Section 1115 waiver program. The premiums noted are for two persons, which could include a parent, and are approximate.
10. **New York** passed legislation to increase SCHIP coverage to 400 percent of the federal poverty line. This plan was rejected by CMS, but the state has used state funds to implement the expansion from 250 percent to 400 percent of the federal poverty line.
11. In **Pennsylvania**, children under 2 years old are exempt from the 6-month waiting period. In **Pennsylvania**, the premium varies by health plan. The amount noted is an average of the monthly premiums required by the various health plans.
12. The figures noted for **Rhode Island** may include coverage for parents.
13. In **Vermont**, Medicaid covers uninsured children in families with income at or below 225 percent of the federal poverty line; uninsured children in families with income between 226 and 300 percent of the federal poverty line are covered under a separate SCHIP program. Underinsured children are covered under Medicaid up to 300 percent of the federal poverty line. This expansion of coverage for underinsured children was achieved through an amendment to the state's Medicaid Section 1115 waiver. In **Vermont**, the waiting period is 30 days. **Vermont** requires premiums in children's Medicaid and its separate SCHIP program. For children in families with income between 225 and 300 percent of the federal poverty line there are different premium amounts depending on whether the family has other insurance or does not have other insurance. The first amount noted is for families with other insurance and the second is for families without other insurance.
14. **Washington** passed legislation to increase SCHIP to 300 percent of the federal poverty line in January 2009.
15. **Wisconsin** passed legislation to increase children's health coverage to 300 percent of the federal poverty line. In response to the August 17<sup>th</sup> directive, Wisconsin uses SCHIP funds for children in families with income up to 250 percent of the federal poverty line and uses state funds for children with family incomes between 250 percent and 300 percent of the federal poverty line. The waiting period under the expansion program only applies to children in families with income above 150 percent of the federal poverty line.

## Notes for Table 2

- ▲ Indicates that a state has shortened this period between July 2007 and January 2009, unless noted otherwise.
- ▼ Indicates that a state has lengthened this period between July 2007 and January 2009, unless noted otherwise.

† The length of time a child is required to be uninsured prior to enrolling in health coverage is sometimes referred to as the waiting period. Exceptions to the waiting periods vary by state – for example, waiting periods are waived if the applicant has involuntarily lost prior insurance coverage. **For states represented in the table in bold**, the waiting period applies to the separate SCHIP program only, unless noted otherwise. States are not permitted to have a waiting period in SCHIP-funded Medicaid expansions without a waiver. **For states represented in the table not in bold**, the waiting period applies to SCHIP-funded Medicaid expansions.

\*Several states have passed legislation to use SCHIP funds to expand their children's health coverage programs to children in families with income 250 percent of the federal poverty line or higher. These states are noted with an asterisk (\*). Information about the waiting periods associated with these expansions can be found in Table 1A.

Table presents rules in effect as of January 2009, unless noted otherwise.

1. In **Alabama**, **Texas** and **Utah** the waiting period is 90 days. In **Vermont**, the waiting period is 30 days.
2. In **Alaska**, the waiting period applies only to children covered under the SCHIP-funded Medicaid expansion.
3. In **Arkansas** and **Minnesota**, the waiting period applies only to children covered under Medicaid Section 1115 waiver programs. In **Wisconsin**, the waiting period applies only to children covered under the Section 1115 waiver and the SCHIP-funded Medicaid expansion. In **South Carolina**, the waiting period only applies to children in the separate SCHIP program.
4. In **Illinois** and **New York**, the waiting period applies only to children covered under the state-funded expansion.
5. In **Missouri** the waiting period starts at 150 percent of the federal poverty line.
6. In **Ohio** there is a six month waiting period in a new state-funded buy-in program that provides coverage to uninsured special-needs children in families with incomes above 300 percent of the federal poverty line.
7. In **Pennsylvania**, children under 2 years old are exempt from the 6-month waiting period.

SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, 2009.

### Notes on Table 3

# The median threshold was computed using the income threshold for each state at which parents can obtain comprehensive coverage that meets federal Medicaid guidelines.

▲ Indicates that a state has expanded eligibility in at least one of its parent insurance programs between July 2008 and January 2009, unless noted otherwise.

▼ Indicates that a state has reduced eligibility in at least one of its parent insurance programs between July 2008 and January 2009, unless noted otherwise.

1. This table takes earnings disregards, when applicable, into account when determining income thresholds for working parents. Computations are based on a family of three with one income earner. In some cases, earnings disregards may be time limited. States may use additional disregards in determining eligibility. In some states, the income eligibility guidelines vary by region. In this situation, the income guideline in the most populous region is used. **Time limited disregards:** In some states, the earnings disregards used to determine eligibility are applied only for the first few months of coverage. Thus, the eligibility limits for most beneficiaries would be lower than the levels that appear in this table. Please see Table 3A for an illustration of the impact of time limited disregards.

2. With the exceptions of **Connecticut, Delaware, Pennsylvania and Washington**, when two thresholds are noted, the first is for "regular" Medicaid programs that provide comprehensive coverage that meets federal Medicaid guidelines and the second refers to coverage established through waivers. The coverage offered through these waivers generally provides fewer benefits and has higher cost-sharing than allowed in Medicaid. In **Connecticut, Delaware, Pennsylvania and Washington**, the second figure refers to coverage available to parents under a state-funded program.

3. Indicates whether the state was not enrolling eligible parents at any time between July 2007 and January 2009.

4. **Delaware** has expanded coverage to parents through a waiver that offers a benefit package identical to the state's traditional Medicaid benefits package with the exception of dental and vision benefits.

5. In **Hawaii**, parents enrolled in Medicaid whose income exceeds 200 percent of the federal poverty line can purchase alternative coverage by paying a monthly premium. This coverage has an income eligibility limit of 300 percent of the federal poverty line.

6. **Maryland** expanded coverage for parents to 116 percent of the federal poverty line in July 2008.

7. **New Jersey** expanded coverage for parents to 200 percent of the federal poverty line in September 2008.

8. **Rhode Island** reduced coverage for parents to 175 percent of the federal poverty line in October 2008.

9. Since 2002, **Texas** has been in the process of transitioning to a new computer system to process applications. The earnings disregard under the new system is slightly more generous than that under the old system. The policy reflected in the table is that applied under the new system because the state intends for all applicants and recipients eventually to be processed under this system. However, the great majority of those parents currently enrolled in **Texas'** Medicaid program are evaluated under the old system in which the income threshold for a working parent is \$308 per month rather than \$402 per month.

10. **Wisconsin** expanded coverage for parents to 200 percent of the federal poverty line in February 2008.

11. In **Wyoming**, the earnings disregard is based on marital status and whether one or both parents are employed. The figures in this table represent the income thresholds for families with unmarried parents with one income earner.

SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, 2009.

## Notes on Table 3A

# The median threshold was computed using the income threshold for each state at which parents can obtain comprehensive coverage that meets federal Medicaid guidelines. In states with two thresholds listed, the first figure is the income threshold at which parents can obtain such coverage. With the exception of Connecticut, Pennsylvania and Washington, the second figure refers to coverage established through waivers. The coverage offered through waivers generally provides fewer benefits and has higher cost-sharing than allowed in Medicaid. In Connecticut, Pennsylvania and Washington, the second figure refers to coverage available to parents under a state-funded program.

▲ Indicates that a state has expanded eligibility in at least one of its parent insurance programs between July 2008 and January 2009, unless noted otherwise.

▼ Indicates that a state has reduced eligibility in at least one of its parent insurance programs between July 2008 and January 2009, unless noted otherwise.

1. This table takes earnings disregards, when applicable, into account when determining income thresholds for working parents. Computations are based on a family of three with one earner. In some cases, earnings disregards may be time limited. States may use additional disregards in determining eligibility. In some states, the income eligibility guidelines vary by region. In this situation, the income guideline in the most populous region is used.

2. With the exception of **Connecticut, Delaware, Pennsylvania and Washington**, when two thresholds are noted, the first is for "regular" Medicaid programs that provide comprehensive coverage that meets federal Medicaid guidelines and the second refers to coverage established through waivers. The coverage offered through these waivers generally provides fewer benefits and has higher cost-sharing than allowed in Medicaid. In **Connecticut, Delaware, Pennsylvania and Washington**, the second figure refers to coverage available to parents under a state-funded program.

3. Indicates whether the state was not enrolling eligible parents at any time between July 2008 and January 2009.

4. **Delaware** has expanded coverage to parents through a waiver that offers a benefit package identical to the state's traditional Medicaid benefits package with the exception of dental and vision benefits.

5. In **Hawaii**, parents enrolled in Medicaid whose income exceeds 200 percent of the federal poverty line can purchase alternative coverage by paying a monthly premium. This coverage has an income eligibility limit of 300 percent of the federal poverty line.

6. **Maryland** expanded coverage for parents to 116 percent of the federal poverty line in July 2008.

7. **New Jersey** expanded coverage for parents to 200 percent of the federal poverty line in September 2008.

8. **Rhode Island** reduced coverage for parents to 175 percent of the federal poverty line in October 2008.

9. Since 2002, **Texas** has been in the process of transitioning to a new computer system to process applications. The earnings disregard under the new system is slightly more generous than that under the old system. The policy reflected in the table is that applied under the new system because the state intends for all applicants and recipients eventually to be processed under this system. However, the great majority of those parents currently enrolled in **Texas'** Medicaid program are evaluated under the old system in which the income threshold for a working parent is \$308 per month rather than \$402 per month.

10. **Wisconsin** expanded coverage for parents to 200 percent of the federal poverty line in February 2008.

11. In **Wyoming**, the earnings disregard is based on marital status and whether one or both parents are employed. The figures in this table represent the income thresholds for families with unmarried parents with one income earner.

SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, 2009.

## Notes on Table 4

▲ Indicates that a state has expanded eligibility or adopted a simplified procedure for pregnant women between July 2007 and January 2009, unless noted otherwise.

▼ Indicates that a state has reduced eligibility or eliminated a simplified procedure for pregnant women between July 2007 and January 2009, unless noted otherwise.

Table presents rules in effect as of January 2009, unless noted otherwise.

1. With the exception of **Arkansas**, all states with an asset test for pregnancy coverage rely on a standard limit regardless of family size. In **Arkansas**, the asset limit shown is for a family of three.
2. The unborn child option permits states to provide SCHIP coverage to the unborn children of pregnant women.
3. In **California**, the Access for Infants and Mothers (AIM) program is available to pregnant women with income between 201 and 300 percent of the federal poverty line. This program is funded using Title XXI (Unborn Child Amendment).
4. In **Colorado**, coverage for pregnant women with income between 134 and 200 percent of the federal poverty line is provided under a HIFA waiver.
5. **Connecticut** has a presumptive-like eligibility process for pregnant women, known as expedited eligibility. The state expanded eligibility for pregnant women from 185 percent to 250 percent of the federal poverty line in January 2008.
6. In **Hawaii**, pregnant women enrolled in Medicaid whose income exceeds 185 percent of the federal poverty line can purchase Quest-Net coverage by paying a monthly premium. This coverage has an income eligibility limit of 300 percent of the federal poverty line. Limited coverage is available to persons already receiving Medicaid.
7. **Indiana** plans on implementing presumptive eligibility for pregnant women in the summer of 2009.
8. In **Iowa**, the asset limit only applies to “regular” Medicaid and only considers liquid assets. Pregnant women with income between 200 and 300 percent of the federal poverty line with high medical expenses can “spend down” to qualify for the state’s waiver program.
9. **Louisiana** eliminated presumptive eligibility in 2007 because they have an expedited enrollment process. The state can enroll a pregnant woman in 3 calendar days.
10. **Maryland** does not have a presumptive eligibility process but does have section 1115 waiver authority to operate an Accelerated Certification of Eligibility process that provides for accelerated enrollment in coverage for pregnant women who appear eligible based on preliminary income determination.
11. In **New Jersey**, coverage for women with income between 186 and 200 percent of the federal poverty line is provided under a Medicaid Section 1115 waiver. Under this coverage, pregnant women must be uninsured and there are no income deductions.
12. **Ohio** has an “expedited eligibility” process through which pregnant women can obtain 60 days of partial coverage pending documentation of eligibility factors. Inpatient coverage is not available during this period. The state expanded eligibility for pregnant women to 200 percent of the federal poverty line in January 2008.
13. **Oklahoma** and **Oregon** adopted the unborn child option in April 2008.
14. In **Pennsylvania**, presumptive eligibility is available in most of the state; however, an alternate expedited procedure is being piloted in Philadelphia and four surrounding counties.
15. In **Rhode Island**, the Medicaid income eligibility limit for pregnant women is 250 percent of the federal poverty line. There is also a state-funded program for women with income between 251 and 350 percent of the federal poverty line. Under this program, which requires a premium, the state funds the cost of labor and delivery only.
16. **South Carolina** has an “assumptive” eligibility process through which pregnant women can obtain 30 days of coverage pending documentation of eligibility factors.
17. **Tennessee** increased eligibility to 250 percent of the federal poverty line for pregnant women in March 2008.
18. In **Utah**, women who exceed the asset limit may still qualify for coverage if they make a one-time payment of four percent of the value of their assets or \$3,367, whichever is less.
19. In **Vermont**, women with income above 185 percent of the federal poverty line are required to pay a premium.
20. **Virginia** plans to expand coverage to pregnant women up to 200 percent of the federal poverty line in July 2009.
21. In **Wisconsin**, the Medicaid income eligibility limit for pregnant women expanded to 250 percent of the federal poverty line in February 2008. The state uses state funds to provide coverage for women with income between 251 and 300 percent of the federal poverty line.

	Separate SCHIP		Y	Y	

SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, 2009.

## Notes on Table 5

▲ Indicates that a state has simplified one or more of its procedures between July 2007 and January 2009, unless noted otherwise.

▼ Indicates that a state has rescinded one or more simplified procedures between July 2007 and January 2009, unless noted otherwise.

\* “Total Medicaid” indicates the number of states that have adopted a particular enrollment simplification strategy for their children’s Medicaid program. All 50 states and the District of Columbia operate such programs.

\*\* “Total SCHIP” indicates number of states that have adopted a particular enrollment simplification strategy for their SCHIP-funded separate program. 39 states operate such programs. The remaining 11 states and the District of Columbia used their SCHIP funds to expand Medicaid, exclusively. During the survey period **Louisiana** and **South Carolina** created separate SCHIP-funded programs.

\*\*\* “Aligned Medicaid and Separate SCHIP” indicates the number of states that have adopted a particular enrollment simplification strategy and have applied the procedure to both their children’s Medicaid program and their SCHIP-funded separate program. States that have used SCHIP funds to expand Medicaid exclusively are considered “aligned” if the simplified procedure applies to children in the “regular” Medicaid program and the SCHIP-funded expansion program.

Table presents rules in effect as of January 2009, unless noted otherwise.

1. "Regular" Medicaid refers to coverage under Medicaid eligibility standards for children in place prior to SCHIP; states receive "regular" Medicaid matching payments as opposed to enhanced SCHIP matching payments for these children.

2. In states with asset limits, the limit noted is for a family of three.

3. Under federal law, states may implement presumptive eligibility procedures in Medicaid and SCHIP. In **California**, the SCHIP program has a presumptive eligibility process available to families with income up to 200 percent of the federal poverty line. This process is available through the Child Health and Disability Prevention program provider and the accelerated enrollment process, which provides temporary full scope no cost medical coverage. **Colorado** implemented presumptive eligibility for children in Medicaid and SCHIP effective January 2008 (previously, only prenatal presumptive eligibility existed). In **Illinois**, presumptive eligibility is available in children’s Medicaid and SCHIP but not in the state-funded expansion program. In **Kansas**, presumptive eligibility is being piloted at three entities, but it is expected to be expanded further in 2009. **Louisiana** has legislative authority to implement presumptive eligibility, but has not yet received approval from their state plan to implement it in either Medicaid or SCHIP. In **Maryland**, there is an accelerated eligibility process that is available to children who already have an open case for other benefits at a local eligibility office. These children can receive up to three months of temporary eligibility pending a final eligibility determination. In **Missouri**, in September 2008, the state expanded their presumptive eligibility program to all rural health clinics and federally qualified health centers. Children eligible for presumptive eligibility must have a gross family income of 150 percent of the federal poverty line or less. **New York** implemented presumptive eligibility in its children’s Medicaid program in February 2008. **New York's** SCHIP program has a presumptive-like process in which health plans can provide coverage for a 60-day period while the family submits necessary documentation. **Wisconsin** implemented presumptive eligibility for children in families with income up to 150 percent of the federal poverty line in February 2008.

4. In **Alabama**, a telephone interview is required in children's Medicaid. A pilot program between March and September 2007 waived the telephone interview for families that submitted income verification and found very little error.

5. In **Arizona**, as of March 2008, no interview is required in Medicaid regardless of whether the SCHIP paper or electronic application is used. Prior to this date, families that applied for Medicaid using the joint application did not have a face-to-face interview, but families who used another application were subject to the interview requirement.

6. In **Indiana**, county offices may require telephone interview but not face-to-face interviews.

7. **Kentucky** eliminated their face-to-face interview requirement in November 2008.

8. In **Missouri**, children in families with income above 150 percent of the federal poverty line are subject to a “net worth” test of \$250,000.

9. In **Montana** and **Nevada**, families that use the SCHIP application but are found to be eligible for Medicaid must complete a Medicaid addendum before eligibility can be determined.

10. In **New York**, a contact with a community-based “facilitated enroller” meets the face-to-face interview requirement.

11. **Pennsylvania** uses Medicaid and SCHIP applications that solicit “common data elements” in collecting information for Medicaid and SCHIP, thus making Medicaid and SCHIP applications interchangeable.

12. In **Tennessee**, a face-to-face or telephone interview is required in children's Medicaid.

13. In **Texas**, the SCHIP asset test applies only to families with income above 150 percent of the federal poverty line. Texas increased its SCHIP asset limit in September 2007.

14. **Utah** implemented a joint application and eliminated their face-to-face or telephone interview requirement in December 2008. **Utah** counts assets in determining Medicaid eligibility for children over the age of six.

15. In **Vermont**, there is an asset test for children’s Medicaid and SCHIP, however if the countable assets exceed the asset limit the children are eligible under the 1115 waiver, which has no asset test.

SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, 2009.

## Notes on Table 6

▲ Indicates that a state has eliminated an income verification requirement between July 2007 and January 2009, unless noted otherwise.

▼ Indicates that a state has instituted an income verification requirement between July 2007 and January 2009, unless noted otherwise.

\* "Total Medicaid" indicates the number of states that do not ask for verification of income for their children's Medicaid program. All 50 states and the District of Columbia operate such programs.

\*\* "Total SCHIP" indicates number of states that do not ask for verification of income for their SCHIP-funded separate program. 39 states operate such programs. The remaining 11 states and the District of Columbia used their SCHIP funds to expand Medicaid, exclusively. During the survey period **Louisiana** and **South Carolina** created separate SCHIP-funded programs.

\*\*\* "Aligned Medicaid and Separate SCHIP" indicates the number of states that do not ask for verification of income and have applied the procedure to both their children's Medicaid program and their SCHIP-funded separate program. States that have used SCHIP funds to expand Medicaid exclusively are considered "aligned" if the simplified procedure applies to children in the "regular" Medicaid program and the SCHIP-funded expansion program.

Table presents rules in effect as of January 2009, unless noted otherwise.

1. "Regular" Medicaid refers to coverage under Medicaid eligibility standards for children in place prior to SCHIP; states receive "regular" Medicaid matching payments as opposed to enhanced SCHIP matching payments for these children.
2. While families do not have to provide verification of income in the states noted, such states generally verify this information through data matches with other government agencies, such as the Social Security Administration and state departments of labor. Often, families in states with administrative verification still have to provide documentation of income if self-employed or if income is questionable.
3. **Colorado** passed legislation in 2008 that no longer requires income verification from families in Medicaid and SCHIP. This change will be implemented in February 2009.
4. In **Florida**, families with children on Medicaid who were enrolled through the SCHIP process are only required to verify new sources of income at renewal. Families with children on Medicaid who were enrolled through a local office must provide verification of income at renewal.
5. In **Louisiana**, documentation is only required if the state is unable to verify income administratively.
6. In **New York**, income verification is not required at SCHIP renewal if a Social Security number(s) is provided for the parent(s). The state implemented this procedure in its children's Medicaid program in January 2008.
7. In **Utah**, families with children on SCHIP receive one of two renewal forms. One of the renewal forms requires families to provide verification of income only if income has changed. The other form, which is sent to families that have had a change in income during the previous year, requests income verification.
8. In **West Virginia**, a simplified renewal form is used at every other SCHIP renewal. The simplified renewal form requires families to provide verification of income only if income has changed.
9. The **Wisconsin** application asks for income documentation, however, if it is not provided, the state will use databases to verify income administratively.

SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, 2009

## Notes on Table 7

▲ Indicates that a state has simplified one or more of its procedures between July 2007 and January 2009, unless noted otherwise.

▼ Indicates that a state has rescinded one or more simplified procedures between July 2007 and January 2009, unless noted otherwise.

\* “Total Medicaid” indicates the number of states that have adopted a particular renewal simplification strategy for their children’s Medicaid program. All 50 states and the District of Columbia operate such programs.

\*\* “Total SCHIP” indicates number of states that have adopted a particular renewal simplification strategy for their SCHIP-funded separate program. Thirty-nine states operate such programs. The remaining 11 states and the District of Columbia used their SCHIP funds to expand Medicaid, exclusively. During the survey period **Louisiana** and **South Carolina** created separate SCHIP-funded programs.

\*\*\* “Aligned Medicaid and Separate SCHIP” indicates the number of states that have adopted a particular renewal simplification strategy and have applied the procedure to both their children’s Medicaid program and their SCHIP-funded separate program. States that have used SCHIP funds to expand Medicaid exclusively are considered “aligned” if the simplified procedure applies to children in the “regular” Medicaid program and the SCHIP-funded expansion program.

† This column shows the frequency of renewals. If monthly, quarterly or semi-annual income reporting is also required, this frequency is noted in parentheses. Some states require change reporting, which is not addressed in this table. If the frequency of renewal is every 12 months, as opposed to six months or more frequently, the procedure is considered “simplified” for the purposes of this table.

†† “Joint renewal” indicates that the same renewal form is used for children’s Medicaid and SCHIP. In a number of states, separate Medicaid and SCHIP renewal forms can be used to determine eligibility for both programs, however for the purposes of this table, “joint renewal” indicates that the *same form* is used for both programs.

Table presents rules in effect as of January 2009, unless noted otherwise.

1. "Regular" Medicaid refers to coverage under Medicaid eligibility standards for children in place prior to SCHIP; states receive "regular" Medicaid matching payments as opposed to enhanced SCHIP matching payments for these children.
2. In **Arizona**, the face-to-face or telephone interview requirement in Medicaid was eliminated in March 2008. The 12-month continuous eligibility policy in SCHIP only applies to the first 12 months of coverage.
3. In **Arkansas** and **Minnesota**, renewal procedures differ for children and/or families with children enrolled in Medicaid, depending on whether they are eligible under “regular” Medicaid or under expansions pursuant to Medicaid Section 1115 waivers or SCHIP-funded Medicaid expansions. In **Arkansas**, children who qualify under expansion rules receive 12 months of continuous eligibility, as opposed to a 12-month renewal period in “regular” Medicaid. In **Minnesota**, children and parents who qualify under the state’s Section 1115 expansion program have eligibility reviewed every 12 months. In the “regular” Medicaid program, income reviews occur every 6 months and eligibility reviews every 12 months.
4. **California** requires a 6 month renewal (mid-year status report) for children in Medicaid as of January 2009.
5. In **Florida**’s Medicaid program, children under age five receive 12 months of continuous eligibility and children age five and older receive 6 months of continuous eligibility.
6. In **Indiana**’s Medicaid and SCHIP program, children up to age three receive 12 months of continuous eligibility.
7. **Iowa** adopted 12 months of continuous eligibility in Medicaid in July 2008.
8. In **New Jersey**, families of children who have their Medicaid case maintained by the central SCHIP office receive a pre-printed joint renewal form. Families of children with Medicaid cases maintained at a county office do not receive this form. Forms used by county offices vary, however several offices use the joint Medicaid/SCHIP application as a renewal form.
9. **North Dakota** implemented 12 month continuous eligibility for children in Medicaid in June 2008.
10. In **Tennessee**, a face-to-face or telephone interview is required at renewal in “regular” Medicaid. Reviews remain suspended in **Tennessee**’s Section 1115 waiver program.
11. In **Texas**, children covered under SCHIP get 12 months of continuous coverage. However, the state will conduct administrative renewal for children in SCHIP in families with income between 185 and 200 percent of the federal poverty line at 6 months to determine whether income has exceeded 200 percent of the federal poverty line.
12. In **Virginia**, children covered under SCHIP get 12 months of continuous coverage unless the family’s income exceeds the program’s income eligibility guideline or the family leaves the state.
13. In **West Virginia**, a simplified renewal form is used at every other SCHIP renewal. The joint application form, printed in a different color, is used for all other SCHIP and Medicaid renewals.

SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, 2009.

### Notes on Table 8

▲ Indicates that a state has simplified one or more of its procedures for parents between July 2007 and January 2009, unless noted otherwise.

▼ Indicates that a state has rescinded one or more simplified procedures for parents between July 2007 and January 2009, unless noted otherwise.

\* “Aligned Medicaid for Children and Separate SCHIP” indicates the number of states that have adopted a particular enrollment simplification strategy and have applied the procedure to both their children’s Medicaid and their SCHIP-funded separate program. States that have used SCHIP funds to expand Medicaid exclusively are considered “aligned” if the simplified procedure applies to children in the “regular” Medicaid program and the SCHIP-funded Medicaid expansion program. “Regular” Medicaid refers to coverage under Medicaid eligibility standards for children in place prior to SCHIP; states receive “regular” Medicaid matching payments as opposed to enhanced SCHIP matching payments for these children.

\*\* “Total Medicaid for Parents” indicates the number of states that have adopted a particular enrollment simplification strategy and have applied the procedure to both pre-expansion Medicaid for parents and expanded coverage for parents, if the state has expanded coverage for parents. All 50 states and the District of Columbia operate a Medicaid program for parents. 18 states including the District of Columbia have expanded Medicaid coverage for working parents up to 100 percent of the federal poverty line or higher.

† This column indicates whether the simplest application that can be used to apply for children’s coverage can also be used to apply for coverage for parents. In states with “family” applications, parents are not required to complete additional forms or provide additional information to obtain coverage for themselves and the family application can be used to apply for all parents and children, whether they are eligible for Medicaid or a separate SCHIP program.

Table presents rules in effect as of January 2009, unless noted otherwise.

1. In states with asset limits, the limit noted is for a family of three.
2. In **Alabama**, a telephone interview is required in Medicaid. A pilot program between March and September 2007 waived the telephone interview for families that submitted income verification and found very little error.
3. In **Alaska**, the asset limit for parents is \$3,000 if the household includes a person age 60 or older.
4. In these states, “Expanded Medicaid for Parents” refers to coverage established through waivers. The coverage offered generally provides fewer benefits and has higher cost-sharing than allowed in Medicaid.
5. In **Arizona**, as of March 2008, no interview is required in Medicaid regardless of the type of application used to apply. Prior to this date, families that applied for Medicaid using the joint application did not have a face-to-face interview, but families who used another application were subject to the interview requirement.

6. In **Arkansas**, county offices have the option of requiring either a face-to-face or telephone interview for Medicaid. Applicants who have had an active Medicaid case within the past year are not required to do an interview. The joint Medicaid/SCHIP application in **Arkansas** has a place for parents to indicate they are interested in health coverage for themselves. Parents that indicate an interest in coverage for themselves are required to complete a separate Medicaid application.
7. In **California, Georgia, Idaho, Indiana, Iowa, North Carolina, Oklahoma, South Carolina, and South Dakota**, the same simplified application can be used to apply for coverage for children and parents. However, parents must complete additional forms or take additional steps (such as to provide information on assets or absent parents) prior to an eligibility determination for themselves.
8. In **Florida**, families that submit applications that do not appear to be prone to error or fraud, known as “green track” applications, are not required to do an interview.
9. In **Indiana**, a telephone interview will meet the interview requirement if the parent is applying for Medicaid only.
10. In **Iowa**, the waiver program for parents requires a separate application.
11. In **Kansas**, there is no asset limit for parents unless there is a trust involved. Trusts are evaluated on a case by case basis and if countable, there is a limit of \$2,000 for one person or \$3,000 for a family of two or more.
12. **Kentucky** eliminated their face-to-face interview requirement for parents in November 2008.
13. **Louisiana’s** Medicaid/SCHIP application is not designed for use by parents but can be used in some circumstances to determine eligibility for a parent.
14. **Maine’s** asset rules exempt \$8,000 for an individual and \$12,000 for a household of 2 or more in certain savings, including retirement savings.
15. **Maryland** expanded coverage to parents in 2008. They now have a family application for coverage and no longer require a face-to-face interview for parents applying to Medicaid.
16. In **Minnesota**, the asset test applies to two or more adults in a household including parents, caretakers etc.
17. In **Missouri**, children in families with income above 150 percent of the federal poverty line are subject to a “net worth” test of \$250,000.
18. In **Montana**, the state released an application that can be used for any Medicaid coverage.
19. In **New Mexico**, there is a single application that can be used to apply for Medicaid for children and parents. The state’s waiver coverage for parents has its own application.
20. In **New York**, there are two applications families may use to apply for health coverage for their children, one of which can also be used to apply for parents. A contact with a community-based “facilitated enroller” meets the Medicaid face-to-face interview requirement. In **New York**, the waiver program requires a separate application.
21. **Pennsylvania** uses Medicaid and SCHIP applications that solicit “common data elements” in collecting information for Medicaid and SCHIP, thus making Medicaid and SCHIP applications interchangeable. **Pennsylvania’s** expanded coverage for parents is state-funded.
22. In **Tennessee**, a face-to-face or telephone interview is required.
23. **Texas** reinstated their face-to-face interview requirement for parents in Medicaid in October 2007. The SCHIP asset test only applies to families with income above 150 percent of the federal poverty line.
24. In **Utah**, a face-to-face or telephone interview is no longer required for Medicaid. **Utah** counts assets in determining Medicaid eligibility for children age 6 and older. In December 2008, **Utah** implemented a joint application encompassing all of their health coverage programs (Medicaid, CHIP, PCN and UPP).
25. In **Vermont**, there are two applications families may use to apply for health coverage for their children, one of which can also be used to apply for parents. The state has an asset test for children’s Medicaid and SCHIP, however if the countable assets exceed the asset limit, the children are eligible under the 1115 waiver which has no asset test.
26. In **Washington**, expanded coverage for parents is state-funded.

SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, 2009.

### Notes on Table 9

▲ Indicates that a state has simplified one or more of its procedures for parents between July 2007 and January 2009, unless noted otherwise.

▼ Indicates that a state has rescinded one or more simplified procedures for parents between July 2007 and January 2009, unless noted otherwise.

\* “Aligned Medicaid for Children and Separate SCHIP” indicates the number of states that have adopted a particular renewal simplification strategy and have applied the procedure to both their children’s Medicaid and their SCHIP-funded separate program. States that have used SCHIP funds to expand Medicaid exclusively are considered “aligned” if the simplified procedure applies to children in the “regular” Medicaid program and the SCHIP-funded Medicaid expansion program. “Regular” Medicaid refers to coverage under Medicaid eligibility standards for children in place prior to SCHIP; states receive “regular” Medicaid matching payments as opposed to enhanced SCHIP matching payments for these children.

\*\* “Total Medicaid for Parents” indicates the number of states that have adopted a particular renewal simplification strategy and have applied the procedure to both pre-expansion Medicaid for parents and expanded coverage for parents, if the state has expanded coverage for parents. All 50 states and the District of Columbia operate a Medicaid program for parents. 18 states including the District of Columbia have expanded Medicaid coverage for parents up to 100 percent of the federal poverty line or higher.

† This column shows the frequency of renewals. If monthly, quarterly or semi-annual income reporting is also required, this frequency is noted in parentheses. Some states require change reporting, which is not addressed in this table. If the frequency of renewal is every 12 months, as opposed to six months or more frequently, the procedure is considered “simplified” for the purposes of this table.

Table presents rules in effect as of January 2009, unless noted otherwise.

1. In **Arizona**, the face-to-face or telephone interview requirement was rescinded for children and parents in Medicaid in March 2008.

2. In these states, “Expanded Medicaid for Parents” refers to coverage established through waivers. The coverage offered generally provides fewer benefits and has higher cost-sharing than allowed in Medicaid.

3. In **Arkansas** and **Minnesota**, renewal procedures differ for families with children enrolled in Medicaid, depending on whether they are eligible under “regular” Medicaid or under Section 1115 waivers or SCHIP-funded Medicaid expansions. In **Arkansas**, children who qualify under expansion rules receive 12 months of continuous eligibility, as opposed to a 12-month renewal period in “regular” Medicaid. In **Minnesota**, individuals who qualify under the state’s Section 1115 expansion program have eligibility reviewed every 12 months. In the “regular” Medicaid program, income reviews are required every 6 months and eligibility reviews are required annually.

4. In **California**, parents must submit a status report at six month intervals when a full eligibility review is not required. A full eligibility review is done annually.

5. In **Florida**, parents who are enrolled in Medicaid, and who do not receive other benefits such as food stamps or TANF, have a 12 month renewal period. Parents that submit applications that don't appear to be prone to error or fraud, known as "green track" applications, are not required to do an interview.
6. In **Indiana**, county offices may require telephone interviews but not face-to-face interviews.
7. In **Nebraska**, parents enrolled in Medicaid must report their income every three months. A full review of eligibility is done every six months. A telephone interview is required at the six month review.
8. Under **New Mexico's** waiver program, families receive a notice instructing them to call to receive a new application, which is used as a renewal form.
9. In **North Dakota**, parents enrolled in Medicaid must report their income monthly. A full review of eligibility is done annually.
10. In **Oregon**, interviews are not required of families receiving Section 1931 Medicaid. The renewal period for families covered under Section 1931 is "up to 12 months" though most families not receiving other benefits have a six-month eligibility period.
11. In **Pennsylvania**, expanded coverage for parents is state-funded.
12. In **Tennessee**, a face-to-face or telephone interview is required at renewal in Medicaid.
13. In **Texas**, children covered under SCHIP get 12 months of continuous coverage beginning in September 2007. The state will conduct administrative renewal for children in families with income between 185 and 200 percent of the federal poverty line at 6 months to determine whether income has exceeded 200 percent of the federal poverty line. Texas reinstated their face-to-face interview requirement for parents at renewal in October 2007.
14. In **Utah**, renewal periods for parent coverage are 12 months, but can be more frequent if income fluctuates.
15. In **Washington**, expanded coverage for parents is state-funded. Under this coverage, eligibility is reviewed every 12 months if the family's income information can be verified through data matches with the Employment Security Department. If income information can not be verified through a data match, eligibility must be reviewed at least twice a year.

## Notes on Table 10

Table presents rules in effect as of January 2009, unless noted otherwise.

1. States in *italics* require the premiums noted in their children's Medicaid programs. **Massachusetts** requires premiums in children's Medicaid (children under six are exempt) and SCHIP. The figures noted for **Minnesota** are for two persons, which could include a parent. The figures noted for **Rhode Island** and **Wisconsin** also may include coverage for parents. **Vermont** requires premiums in children's Medicaid and its separate SCHIP program. All other states require premiums in their separate SCHIP programs only. A dash (—) indicates that no premiums are required in the program; \$0 indicates that no premium is required at this income level; "N/A" indicates that coverage is not available at this income level. Premiums with a parenthetical notation afterwards indicate a premium amount for states with income eligibility up to 200 percent of the federal poverty line if the premium amount is different than that at 151 percent of the federal poverty line.
2. "Increase" indicates that the state has increased premiums or lowered the income level at which premiums are required. "Decrease" indicates that the state has decreased premiums or raised the income level at which premiums are required.
3. In **California**, premiums vary based on whether the family uses the discounted community provider health plan. The first amount noted is the premium required under the community provider health plan. **California** is expected to increase the premium amount in their SCHIP program in February 2009.
4. In **Georgia**, premiums are required only of families with children age six and older. Premiums increased for those families above 200 percent of the federal poverty line.
5. **Hawaii** eliminated the premium requirement for children with income between 250 and 300 percent of the federal poverty line in January 2008.
6. In **Idaho**, families with children covered under the state's new "enhanced" plan are not required to pay premiums.
7. In **Illinois**, premiums for children in AllKids vary by income and household size. For example, the premium for two children in a family with income at 250 percent of the federal poverty line would be \$80 per month.
8. **Illinois, Indiana, Iowa, Kansas, Louisiana, Montana, North Carolina, Ohio, Oklahoma, Washington** and **West Virginia** all have proposed income eligibility expansions for children's health coverage. See Table 1A for the premium schedule for each state's expansion population.
9. In **Minnesota**, the premiums noted apply only to children covered under the Section 1115 waiver program and are approximate. All children with family income below 150 percent of the federal poverty line have premiums limited to \$4 per child per month.
10. In **Nevada**, although Medicaid covers children in families with income up to 100 or 133 percent of the federal poverty line (depending on age), some children with incomes below this level may qualify instead for SCHIP based on the source of income and family composition. Such families with income of 36 percent of the federal poverty line or higher are required to pay premiums.
11. **Ohio's** new expansion to be implemented in January 2009 will have premiums of \$80 a month. There is also a buy-in option for children above 300 percent of the federal poverty line with premiums ranging from \$250 to \$500 per child per month.
12. In **Oklahoma**, premiums noted apply to children in families with income above 185 percent of the federal poverty line that will be enrolled in the Insure Oklahoma / O-EPIC Individual plan. There are no premium requirements for children's Medicaid.
13. In **Pennsylvania**, the premium varies by health plan. The amount noted is an average of the monthly premiums required by the various health plans.
14. In **Rhode Island**, premiums were implemented for families between 133 percent of the federal poverty line and 150 percent of the federal poverty line as of November 2008.
15. In **Tennessee**, as of December 2007, premiums are no longer required for children in TennCare Standard. Premiums are not required for SCHIP program if the family is below 250 percent of the federal poverty line.
16. In **Washington**, the premiums shifted in January 2009. For families with income between 201 percent and 250 percent of the federal poverty line, \$20 per child will be assessed with a \$40 maximum per household. Families between 250 percent and 300 percent of the federal poverty line will have a \$30 per child premium with a maximum of \$60 per household.
17. In **West Virginia**, the premiums noted apply only to children in families with income between 200 percent and 220 percent of the federal poverty line.
18. In **Wisconsin**, the income level at which premiums are required was raised under the state's February 2008 expansion. The required premium amounts are lower under this expansion.

## Notes on Table 10A

Table presents rules in effect as of January 2009, unless otherwise noted.

1. States in *italics* require the premiums noted in their children's Medicaid programs. **Massachusetts** requires premiums in children's Medicaid (children under age six are exempt) and SCHIP. The figures noted for **Minnesota** are for two persons, which could include a parent. The figures noted for **Rhode Island** and **Wisconsin** also may include coverage for parents. **Vermont** requires premiums in children's Medicaid and its separate SCHIP program. All other states require premiums in their separate SCHIP programs only. A dash (—) indicates that no premiums are required in the program; \$0 indicates that no premium is required at this income level; "N/A" indicates that coverage is not available at this income level.
2. In **Arizona**, beneficiaries must pay all outstanding premiums before they can re-enroll in the program.
3. In **California**, premiums vary based on whether the family uses the discounted community provider health plan. The first amount noted is the premium required under the community provider health plan.
4. In **Georgia**, premiums are only required of families with children age six and older.
5. In **Idaho**, families with children covered under the state's new "enhanced" plan are not required to pay premiums.
6. In **Minnesota**, premiums apply only to children covered under the Section 1115 waiver program. The figures noted are approximate.
7. In **Missouri**, the lock-out period only applies to families with income at or above 225 percent of the federal poverty line who fail to pay a recurring premium, but does not apply to families who never paid the initial premium.
8. In **Oklahoma's** new Insure Oklahoma program there will be a lock out period of 6 months.
9. **Tennessee's** buy-in program for children above 250 percent of the federal poverty line has a 6 month lock-out period
10. In **West Virginia**, the premiums noted apply only to children covered with income between 200 percent and 220 percent of the federal poverty line.

SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, 2009.

## Notes on Table 11

“Increase” indicates that the state has increased the co-payment for one or more services between July 2007 and January 2009, unless noted otherwise.

“Decrease” indicates that the state has decreased the co-payment for one or more services between July 2007 and January 2009, unless noted otherwise.

Table presents rules in effect as of January 2009, unless otherwise noted.

“N/A” indicates that the state does not provide coverage at this income level.

1. States in *italics* require these co-payments in their children’s Medicaid programs. With the exception of **Kentucky**, all of these states obtained federal waivers to impose cost-sharing in children’s Medicaid. **Kentucky** used the flexibility in the Deficit Reduction Act of 2005 to impose cost-sharing in its SCHIP-funded Medicaid expansion. **Kentucky** also requires cost-sharing in its separate SCHIP program. All other states charge these co-payments in their separate SCHIP programs only. Per federal law, no state can impose co-payments on Alaska Native or American Indian children.
2. Some states require 18-year-olds to meet the co-payment requirements of adults on Medicaid. In **Alabama**, 18-year-olds are subject to the \$1 non-preventive physician visit co-payment as well as the \$50 co-payment for inpatient care. In **Alaska**, 18-year-olds are subject to the co-payment of \$50 a day for the first four days of inpatient care as well as the \$3 co-payment for non-preventive physician visits. In **Arkansas**, 18 year olds are subject to the co-payment of 10 percent of the cost of the first day of inpatient care. In **Kentucky**, 18-year-olds are subject to the \$2 co-payment for non-preventive physician visits, the 5 percent co-payment for non-emergency use of the emergency room and the \$50 co-payment for inpatient care.
3. In these states, the co-payment for emergency room use in non-emergency situations is higher than noted in the table. This co-payment applies to all children covered under the state’s SCHIP-funded Medicaid expansion and separate SCHIP program. The co-payment amounts for emergency room use in non-emergency situations are as follows: in **Alabama**, \$20; in **Connecticut**, \$25; in **Delaware** and **Florida**, \$10; in **Idaho**, \$3; in **Illinois**, \$2 for families with income between 133 percent and 150 percent of the federal poverty line and \$25 for families with income above 150 percent of the federal poverty line; in **Iowa**, \$25 for families with income above 150 percent of the federal poverty line; in **Kentucky**, a five percent co-insurance is required, which is capped at \$6; in **North Carolina**, \$20 for families with income above 150 percent of the federal poverty line; in **Virginia**, \$25.
4. In **California**, **Connecticut**, **New Hampshire**, **Pennsylvania**, **Tennessee**, **West Virginia** and **Wyoming**, the co-payment for emergency room use is waived if the child is admitted to the hospital. In **California**, no coverage is provided if the services received are not for an emergency condition.
5. In **Florida**, co-payments apply only to children age five and older.
6. In **South Carolina**, infants are eligible up to 185 percent of the federal poverty line; however, no co-payments are required of this coverage group.
7. In **Tennessee** co-payments are required in the state’s waiver program, which is closed to new applicants and the separate SCHIP program. The first amount noted is the premium required under the state’s waiver program and the second is for the separate SCHIP program.
8. In **Utah** the co-payment for an emergency room visit is \$100 for a participating hospital and \$200 for a non-participating hospital.
9. In **West Virginia**, the co-payments for non-preventive physician visits are waived if the child goes to his or her medical home.
10. **Wisconsin** now requires co-payments for the non-preventive physician visits, emergency room visit and inpatient hospital visits under its February 2008 expansion. Children under age 18 with family income below 100 percent of the federal poverty line do not have to pay co-payments.

SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, 2009.

## Notes on Table 12

“Increase” indicates that the state has increased the co-payment for one or more services between July 2007 and January 2009, unless noted otherwise.

“Decrease” indicates that the state has decreased the co-payment for one or more services between July 2007 and January 2009, unless noted otherwise.

Table presents rules in effect as of July 2009, unless otherwise noted.

1. In these states, the co-payment for emergency room use in non-emergency situations is higher than noted in this table. **Alabama, Missouri, Ohio and South Carolina** require a \$3 co-payment for this service. **Arizona** requires a \$1 co-payment for this service. In **Florida**, there is a co-insurance of 5 percent up to the first \$300 of cost (maximum co-insurance is \$15) for this service. In some cases, this co-payment is for outpatient hospital care. In **Illinois**, a co-payment is required for parents with income above 133 percent of the federal poverty line. The co-payment is \$2 or \$25, depending on income. In **Indiana**, the co-payment varies based on whether or not the individual is covered under the Primary Care Case Management system. If covered under PCCM, the co-payment is \$1 or \$2. If not covered under PCCM, the co-payment is \$3. In **Kentucky**, the co-payment is five percent of the cost. **Minnesota** requires a \$6 co-payment for this service for parents covered under “regular” Medicaid and its waiver program. **Montana** requires a \$5 co-payment for this service. **North Dakota** requires a \$6 co-payment for this service. In **Pennsylvania**, the co-payment for this service under “regular” Medicaid is \$0.50 to \$3.00 depending on the cost of the visit. In **South Dakota**, the co-payment for this service is five percent of the allowable Medicaid reimbursement up to a maximum of \$50. **Utah** requires a \$6 co-payment for this service for parents covered under “regular” Medicaid. **Wyoming** requires a co-payment of \$6 for this service.
2. With the exception of **Pennsylvania** and **Washington**, when two income thresholds are noted, the first is for “regular” Medicaid programs that provide comprehensive coverage that meets federal Medicaid guidelines and the second refers to coverage established through waivers. In **Pennsylvania** and **Washington**, the second threshold noted refers to coverage available to parents under a state-funded program.
3. In **Illinois**, the second amounts noted, which vary by income, are the co-payments required of parents with income above 133 percent of the federal poverty line.
4. In **New Jersey**, parents with income above 150 percent of the federal poverty line are required to pay a co-payment of \$35 for emergency room visits.
5. In **New Mexico**, the co-payments required in the state’s waiver program vary by income and the co-payment for emergency room use is waived if the person is admitted to the hospital.
6. In **Oklahoma**, the co-payment for emergency room care is waived if the patient is admitted to the hospital.
7. In **Pennsylvania**, the co-payment for emergency room use under the state-funded program is waived if the parent is admitted.
8. In **Washington's** state-funded program, the co-payment for emergency room care is waived if the patient is admitted to the hospital. If the patient is not admitted to the hospital, a \$100 co-payment applies. If the patient is admitted, whether or not it is through the emergency room, they are subject to a 20 percent co-insurance after a \$150 annual deductible is met. The maximum facility charge per admittance for inpatient care is \$300.
9. **Wisconsin** now requires co-payments for emergency room visits and inpatient hospital visits under its February 2008 expansion.

SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, 2009.

## Notes on Table 13

“Increase” indicates that the state has increased the co-payment for prescriptions between July 2007 and January 2009, unless noted otherwise.

“Decrease” indicates that the state has decreased the co-payment for prescriptions between July 2007 and January 2009, unless noted otherwise.

Table presents rules in effect as of January 2009, unless otherwise noted.

1. States in *italics* require these co-payments in their children’s Medicaid programs. With the exception of **Kentucky**, all of these states obtained federal waivers to impose cost-sharing in children's Medicaid. **Kentucky** used the flexibility in the Deficit Reduction Act of 2005 to impose cost-sharing in its SCHIP-funded Medicaid expansion. **Kentucky** also requires cost-sharing in its separate SCHIP program. All other states charge these co-payments in their separate SCHIP programs only. Per federal law, no state can impose co-payments on Alaska Native or American Indian children.

2. In these states, when two amounts are noted, the first is for "regular" Medicaid programs that provide comprehensive coverage that meets federal Medicaid guidelines and the second refers to coverage established through waivers, or in the case of **Washington**, state-funded coverage.

3. In **Alabama** and **Arkansas**, 18-year-olds are subject to the \$.50 to \$3 Medicaid co-payment for adults. In **Alaska**, 18-year-olds are subject to the \$2 Medicaid co-payment for adults. In **Kentucky**, 18-year-olds are subject to the \$1, \$2 or 5 percent co-payment for adults. In **Wisconsin**, 18-year-olds covered under the waiver program who are not in managed care are subject to \$1 or \$3 co-payments for adults. Under its expansion implemented in February 2008, children under 18 years old with income above 100 percent of the federal poverty line are subject to a \$1, \$3 or \$5 co-payment.

4. In **Alabama, Colorado, Illinois, New Jersey, North Carolina, Tennessee, Texas, Utah, Virginia, and West Virginia**, the co-payment amounts for children depend on family income:

- In **Alabama**, families with children with income up to 150 percent of the federal poverty line pay \$1 for generic prescriptions, \$3 for preferred brand name prescriptions and \$5 for non-preferred brand name prescriptions. Families with income above 150 percent pay \$2 for generic prescriptions, \$5 for preferred brand name prescriptions and \$10 for non-preferred brand name prescriptions.
- In **Colorado**, families with children with income between 101 and 150 percent of the federal poverty line are subject to a \$1 co-payment for all prescriptions. Families with income above 150 percent of the federal poverty line pay \$3 for generic prescriptions and \$5 for brand name prescriptions.
- In **Illinois**, families with children with income up to 150 percent of the federal poverty line pay \$2 for all prescriptions. Families with income above 150 percent of the federal poverty line pay \$3 for generic prescriptions and \$5 for brand name prescriptions.
- In **New Jersey**, families with children with income between 150 percent and 200 percent of the federal poverty line pay \$1 for generic prescriptions and \$5 for brand name prescriptions. Families with income above 200 percent of the federal poverty line pay \$5 for generic and brand name prescriptions and \$10 for prescriptions for more than a 34 day supply of medication.
- In **North Carolina**, families with children with income up to 150 percent of the federal poverty line pay \$1 for generic prescriptions and brand name prescriptions for which no generic version is available and \$3 for brand name prescriptions. Families with income above 150 percent of the federal poverty line pay \$1 for generic prescriptions and brand name prescriptions for which no generic version is available and \$10 for brand name prescriptions.
- In **Tennessee**, families with children in the separate SCHIP program with income up to 150 percent of the federal poverty line pay \$1 for generic, \$3 for preferred brand name and \$5 non-preferred brand name. Families with children with income above 150 percent of the federal poverty line pay \$5 for generic, \$20 for preferred brand name and \$40 for non-preferred brand name.
- In **Texas**, families with children with income at or below 100 percent of the federal poverty line pay \$3 for brand name prescriptions. Families with income between 101 percent and 150 percent of the federal poverty line pay \$5 for brand name prescriptions. Families with income between 151 percent and 200 percent of the federal poverty line pay \$5 for generic prescriptions and \$20 for brand name prescriptions.
- In **Utah**, families with children with income up to 100 percent of the federal poverty line pay \$1 for prescriptions under \$50 and \$3 for prescriptions over \$50 for generic and brand name prescriptions and 5 percent of the cost for non-preferred prescriptions. Families with children with income between 101 percent and 150 percent of the federal poverty line pay \$5 for generic and brand name prescriptions and 5 percent of the cost for non-preferred prescriptions. Families with income above 150 percent of the federal poverty line pay \$10 for generic prescriptions and 25 percent of the cost for brand name prescriptions and 50 percent of the cost non-preferred prescriptions.
- In **Virginia**, families with children with income up to 150 percent of the federal poverty line pay \$2 for prescriptions. Families with income above 150 percent of the federal poverty line pay \$5 per prescription.

- In **West Virginia**, families with children with income below 150 percent of the federal poverty line pay \$0 for generic prescriptions and \$5 for brand name or preferred prescriptions. Families with income above 150 percent of the federal poverty line pay \$0 for generic prescriptions, \$10 for brand name prescriptions and \$15 for preferred prescriptions.

5. In **Arkansas**, the co-payment noted only applies to children covered under the state's Section 1115 expansion component. In **Tennessee**, the co-payments noted are required of children covered under the state's Section 1115 expansion component and the separate SCHIP program.

6. In **Florida**, co-payments apply only to children age five and older.

7. In **Illinois**, the first amount shown in the table applies to parents with income below 133 percent of the federal poverty line. The second amounts noted, which vary by income, are the co-payments required of parents with higher incomes.

8. In **Iowa**, the prescription co-payment noted in the table applies to "regular" Medicaid for parents only. There is no prescription coverage in the state's waiver program.

9. In **Massachusetts**, co-payments for prescription drugs for parents increased effective January 2009, with the cost of generics going from \$1 to \$2.

10. In **Minnesota**, the second amount noted is the co-payment required in the state's expansion program for parents.

11. In **Montana**, it is now possible to obtain prescriptions at: \$6 for a generic mail-order 3 month supply; \$10 brand-name mail order 3 month supply.

12. In **Nevada**, the amounts noted apply to parents covered under "regular" Medicaid. Parents enrolled in the waiver coverage are subject to the co-payments required by their employer-sponsored plan.

13. In **New Hampshire**, brand name prescriptions for children are \$5 if no generic version is available.

14. In **New Jersey**, the second amounts noted are the co-payments required in the state's expansion program for parents.

15. In **New Mexico**, the co-payment applies only to children in families with income above 185 percent of the federal poverty line. Under **New Mexico's** waiver program, co-payments are only required for the first four prescriptions each month.

16. In **New York**, the second amounts noted are the co-payments required in the state's expansion program for parents.

17. In **Oklahoma's** new Insure Oklahoma / O-EPIC Individual Plan, co-payments will apply only to children in families with income above 185 percent of the federal poverty line. There are no co-payments for prescriptions for children's Medicaid.

18. In **Oregon**, prescriptions ordered through the home-delivery pharmacy program do not have co-payments.

19. In **Pennsylvania**, co-payments are required for families with children with income above 200 percent of the federal poverty line. The co-payments are \$9 for brand name prescriptions and \$6 for generic prescriptions. In **Pennsylvania**, the prescription co-payment noted in the table applies to "regular" Medicaid only. There is no prescription coverage in the state-funded program.

20. In **Utah**, the co-payment structure changed. As a result, at some income levels there was an increase in the required co-payment amounts.

21. In **West Virginia**, as of December 2008, families that are between 200 percent and 220 percent of the federal poverty line pay \$0 for generic and \$20 for brand name prescriptions.

22. In **Wisconsin**, co-payments currently only apply to parents covered under the state's expansion coverage who are not in managed care with incomes at or above 150 percent of the federal poverty line. Under its expansion plan implemented in February 2008, the co-payment only applies to parents with income at or above 150 percent of the federal poverty line and increased to \$1-\$5 for generic medicines.
