

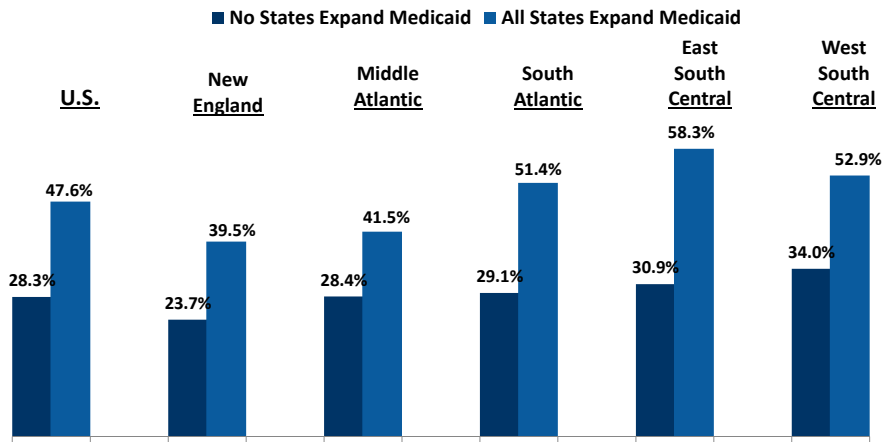

FIGURE 14

Percentage Reduction in Uninsured Under the ACA With All States Expanding and No States Expanding Medicaid, 2022

SOURCE: Urban Institute estimates prepared for the Kaiser Commission on Medicaid and the Uninsured, October 2012. NOTE: Selected Regions Displayed: The New England region includes CT, ME, MA, NH, RI, and VT. The Middle Atlantic region includes DE, DC, MD, NJ, NY, and PA. The South Atlantic region includes FL, GA, NC, SC, VA, and WV. The East South Central region includes AL, KY, MS, and TN. The West South Central region includes AR, LA, OK and TX.

FIGURE 15

Summary

- If all states implement the ACA Medicaid expansion, the federal government will fund the vast majority of the increased Medicaid costs.
- If all states implement the expansion, gains in Medicaid coverage would substantially reduce the number of uninsured
- Due to other provisions in the ACA, states will face increased enrollment and spending even if they do not implement the Medicaid expansion
- The additional state cost of implementing the Medicaid expansion is small relative to total state spending without the expansion and relative to large increases in federal funding
- Accounting for reductions in spending on uncompensated care, states as a whole are likely to see net savings from the Medicaid expansion
- States may be able to achieve other savings that could not be accounted for in this report using 50 state data
