

Special study on
AID TO HIV/AIDS CONTROL

Results and further action

Julia Benn

Development Co-operation Directorate, OECD

July 2004

Study carried out in February - May 2004

**by the Secretariat of the Development Assistance Committee (DAC)
in collaboration with:**

- members of the DAC Working Party on Statistics and**
- Joint United Nations Programme on HIV/AIDS (UNAIDS)**

Rationale for the study

Current data:

- **May not relate solely to HIV/AIDS control as covers all STDs.**
- **Does not encompass relevant activities that are integrated into wider health programmes.**
- **Does not capture interventions outside the health sector.**
- **Does not distinguish between prevention, treatment and care.**

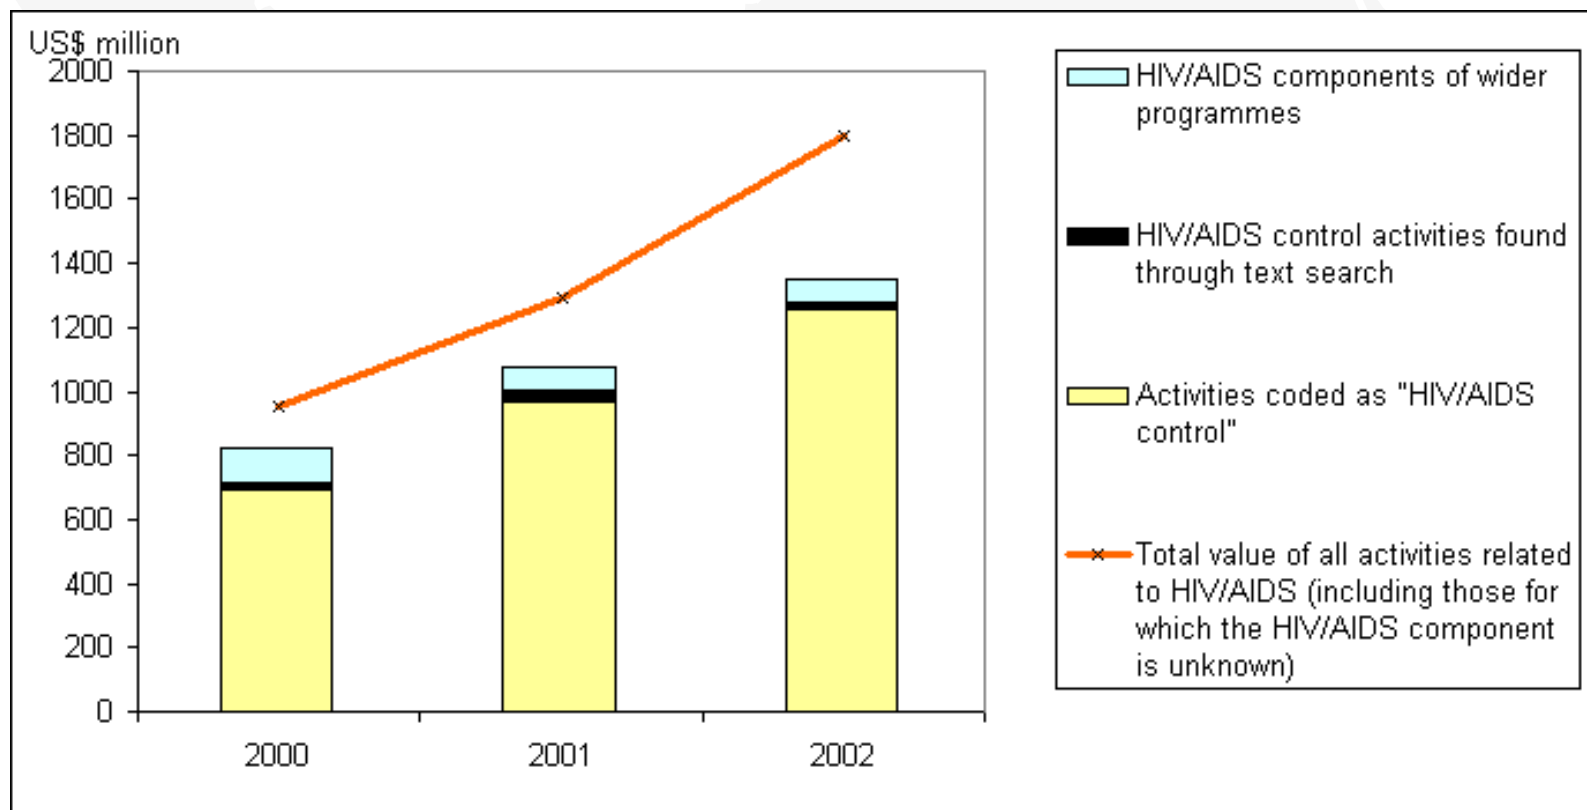

Scope of the study

Examine, verify and complete data on ODA commitments for three years (2000-02) so as to give

a reliable statistical estimate of the magnitude of DAC members' aid to HIV/AIDS control.

DAC members' bilateral aid to HIV/AIDS control in 2000-02, on the average, US\$ 1.1-1.3 billion per year

A faint, light gray world map is visible in the background of the slide, centered behind the text.

DAC members' total aid to HIV/AIDS control
in 2000-02, on the average, US\$ 2.2-2.4 billion per year

Bilateral: US\$ 1.1-1.3 billion

Global Fund: US\$ 0.5 billion

UNAIDS: US\$ 0.1 billion

Imputed multilateral: US\$ 0.6 billion

Further action

Clarify definition: “aid to HIV/AIDS control” covers activities that have HIV/AIDS control as their primary objective.

Create a new purpose code (purpose codes) to separately identify social mitigation of HIV/AIDS.

Identify, and include in analyses, reproductive health activities that can (or are likely to) have a dual purpose; and basic health activities relevant to HIV/AIDS treatment.

CREDITOR REPORTING SYSTEM

Aid Activities
in Support of
HIV/AIDS Control

2000-2002

SYSTÈME DE NOTIFICATION
DES PAYS CRÉANCIERS

Activités d'aide
pour la lutte contre
le VIH/sida
