Survey of Asians in the Bay Area

December 2004

Methodology

The Survey of Asians in the Bay Area is a joint project of the San Jose Mercury News and the Henry J. Kaiser Family Foundation. Representatives of the two organizations worked together to develop the survey questionnaire and analyze the results. The Kaiser Family Foundation paid for the survey-related expenses, and each organization bears sole responsibility for the work that appears under its name.

The survey was conducted by telephone from May 27 to July 18, 2004 among 1,095 self-identified Asian adults, 18 years and older, who were selected at random. Selected questions were also asked of 1,054 non-Asians. All respondents live in the Bay Area of California, which was defined as Alameda, Contra Costa, Marin, Napa, San Francisco, Santa Clara, San Mateo, Sonoma, and Solano counties. International Communications Research (ICR) of Media, PA conducted the fieldwork in English or one of four Asian dialects (Cantonese, Mandarin, Tagalog, and Vietnamese). Interviewing in Hindi was considered, but it was determined that this would have a negligible effect due to the incredibly high percentage of Indians with sufficient English language skills. Of the total Asian interviews, 17% were conducted completely in an Asian dialect and 1% were conducted in both an Asian dialect and English.

The sample design employed a highly stratified disproportionate RDD sample, including oversamples of Indians, Filipinos, and Vietnamese. The results are weighted to represent the actual distribution of self identified Asian adults and non-Asian adults in the Bay Area.

The survey's margin of sampling error is +/- 3.9 percentage points for Asians and +/- 3.4 percentage points for non-Asians. This project also highlights results for various subgroups of Asians. The sample size and margin of sampling error for each of these groups are shown in the table below.

Unweighted Number of Respondents and Margin of Sampling Error

	Unweighted Number of Respondents (n)	Margin of Sampling Error
Total Asians	1,095	+/- 3.9%
Chinese	413	6
Asian Indian	147	12.1
Filipino	149	10.3
Vietnamese	186	10.1
Native Born Asians	231	7.5
Foreign Born Asians	863	4.5
Total Non Asians	1,054	3.4

Note: (1) Sampling error may be larger for other subgroups and sampling error is only one of many potential sources of error in this or any other public opinion poll. (2) Table percentages may not add to 100% due to rounding. (3) Data is not available for subgroups with fewer than 100 respondents. This is denoted with an "NA" throughout the topline.
