Source: Urban Institute estimates based on data from CMS (Form 64).

Note: Does not include administrative costs, accounting adjustments, or the U.S. Territories. Total Medicaid spending including these additional items was \$258.2 billion in FFY 2002. Figures may not sum to totals due to rounding.

\* Tables 2 and 3 provide more detail on which services are included under "acute" and "long-term" care. "DSH" refers to disproportionate share hospital payments.

\*\* Of \$2.9 billion in prepaid/managed care expenditures reported by Arizona, 68% was assumed to pay for acute care and 32% was assumed to pay for long-term care. These proportions are based on data from the "2002 AHCCCS Overview" (<http://www.ahcccs.state.az.us/Publications/overview/2002/contents.asp>).
