No	57	64	47

Methodology

This Kaiser Family Foundation and seventeen magazine National Survey of Teens: Virginity and the First Time is a random-sample survey of 508 teens, ages 15-17. The survey was designed by the Foundation and seventeen and conducted by telephone by International Communications Research (ICR) between June 4 - 9, 2003 as part of their monthly teen Omnibus survey. The margin of error is plus or minus 5% for the total sample and may be larger for certain subsets presented in this analysis.
