NOTES: States that report not covering a service are automatically coded as “-” in copay columns. NR - the state did not respond on the related service or copay. All responses refer to adult coverage in Medicaid Fee-For-Service as of January of 2013; see methodology section for more information. No data for FL, GA, IN, KS, LA, NE, NM, OH, SC, VT, and WI.

SOURCE: KCMU/HMA Survey of State Medicaid Coverage of Adult Preventive Services, January 2013.

## Table 5B Notes

- 1) Alabama - Tdap are limited to age 7 years and older. Td booster is limited to age 10-55 years for SBRW recipients (no age restriction for other benefit plans). HPV immunizations are covered for those 18 and younger.
- 2) Arizona - HPV is only covered for EPSDT ages.
- 3) Arkansas - The state covers HPV immunizations per beneficiary's or parent/guardian's choice.
- 4) California - All copays listed are \$1.
- 5) Colorado - For Td Booster and t-dap, for all immunizations there is no cost sharing on immunizations for clients aged 19 and 20.
- 6) District of Columbia - HPV vaccine coverage for males is approved starting April 2013.
- 7) Illinois - HPV vaccine is covered with no co-pay. No co-pay when administration billed as preventive visit, otherwise a co-pay is applied.
- 8) Iowa - The following immunizations are payable but require an appropriate supporting diagnosis code and are not unsupported screenings: Td booster and Tdap, MMR, Varicella, and Zoster.
- 9) Kentucky - The state exempts individuals under 18 years of age.
- 10) Maine - The state noted that there may not be unique procedure codes to identify the specific service(s) or they may be incidental to the office visit of the day. Copays are charged for hospital services, FQHCs and RHCs, but not for physician services, nursing facilities, ICF-IDs, and Indian Health Centers. Members are also exempt from co-payment for family planning services and supplies, and for services furnished to individuals under 21, pregnant women up to 3 months post-partum. Covered for ages 18 and under, 19 and 20 year olds with a Prior Authorization.
- 11) Maryland - All of the services, immunizations and tests listed are covered when medically necessary for adults. The cost of the vaccine is covered along with the administration (under the office visit).
- 12) Massachusetts - The state noted a 90% match for the HPV vaccine under family planning services when appropriate criteria are met.
- 13) Missouri - All copays listed for covered vaccinations are \$0.50 - \$2.
- 14) North Carolina – The state noted that all services are covered under an annual preventive health exam or office visit. Td boosters are also covered for wound management when needed. HPV immunizations are covered for those 19 and 20 years old, but are not covered for those 21-26. Injectable Influenza vaccine (for all ages) and FluMist (for 19-20 year olds) are covered.
- 15) North Dakota - The state reimburses HPV for females and males for ages 19, 20, 21. The North Dakota Department of Health (NDDoH) supplies HPV vaccine for females and males ages 9-18 and 22-26. The state also noted that NDDoH supplies MMR for all 19 years of age and older enrolled in ND university or college.
- 16) Rhode Island - The state noted that it covers pregnant women through managed care.
- 17) Tennessee - The state noted that all services are provided as medically necessary.
- 18) Virginia – Department of Medical Assistance Services (DMAS) covers vaccines until age 21 as preventive services. Virginia Medicaid does not cover routine immunizations for adults (age 21 and older.) However, Virginia Medicaid covers adult immunizations when medically indicated on an individual basis. When adult immunization is covered, Virginia Medicaid does not require a copay for the vaccine itself, but there is a copay for the physician or clinic visit.
