

Kate Berry is Senior Vice President of Clinical Innovation with AHIP. In this role, Ms. Berry oversees programs related to chronic disease prevention and management such as diabetes, asthma, and mental health. Kate also works on issues related to telehealth from a clinical and policy perspective.

Prior to joining AHIP, Ms. Berry was the Chief Executive Officer of National eHealth Collaborative (NeHC), a public-private partnership that worked closely with the Department of Health and Human Services (HHS) and many healthcare stakeholders to encourage widespread adoption of health information technology to improve patient-centeredness and drive greater value.

Previously, Ms. Berry was Senior Vice President of Surescripts. While at Surescripts, Ms. Berry created the Center for Improving Medication Management and served as its Executive Director. The mission of the Center was to improve outcomes of medication management through collaboration among physician practices, pharmacists, payers/employers, and patients, including leveraging technology.

Ms. Berry is a member of the Board of Governors at the Patient-Centered Outcomes Research Institute (PCORI). She holds a Master's degree in public policy from Duke University and a Bachelor of Arts degree in political science and English from Goucher College in Maryland.
