

New Mexico Health Insurance Premium Summary 2014

* This document is designed for web site access only. Please use the QHP's 2014 (Printable) version to print on the legal size paper.

The premiums shown below are only **preliminary** and reflect what carriers have submitted to the New Mexico Superintendent of Insurance (NM OSI). These plans are currently in the review process.

Premiums may change as a result of NM OSI's evaluation of these plans.

Premiums shown are monthly for an individual, and are based on premiums submitted by the insurers for a 40-year-old non-smoker at multiple plan levels, except for the catastrophic premiums.

Catastrophic coverage has lower premiums and is designed for individuals under 30 or those 30 and over who meet certain financial eligibility requirements.

Premiums do not reflect any savings due to federal tax credits for which individuals or families may be eligible.

Two key factors account for the variability of the premiums within the coverage levels of bronze (60% of costs paid by the plan), silver (70%), gold (80%), platinum (90%) and catastrophic.

1. **Geography** – The range shown for each level includes rates submitted for plans across all regions of the state. Some regions have higher healthcare costs, leading to higher health insurance costs in those regions.

2. **Plan Design** – Within each level of coverage, there is variation among deductibles, co-payments and out-of-pocket maximums. These differences provide more choices for consumers

REGION 2: Farmington MSA
