

ASPE

Issue BRIEF

HEALTH INSURANCE MARKETPLACE: FEBRUARY ENROLLMENT REPORT For the period: October 1, 2013 – February 1, 2014

February 12, 2014

This is the fourth in a series of issue briefs highlighting national and state-level enrollment-related information for the Health Insurance Marketplace (Marketplace hereafter).¹ This brief includes data for states that are implementing their own Marketplaces (also known as State-Based Marketplaces or SBMs), and states with Marketplaces that are supported by or fully run by the Department of Health and Human Services (including those run in partnership with states, also known as the Federally-facilitated Marketplace or FFM).

This brief also includes updated data on the characteristics of persons who have selected a Marketplace plan (by gender, age, and financial assistance status), and of the plans that they have selected (by metal level); along with additional data on the characteristics of people who have selected plans in the FFM and the plans they have selected.

Cumulative enrollment-related activity during the first four months (*10-1-13 to 2-1-14*) of the initial open enrollment period is reported for several metrics, including: the number of visits to the Marketplace websites, the number of calls to the Marketplace call centers, the number of persons who have been determined or assessed eligible by the Marketplaces for Medicaid or the Children's Health Insurance Program (CHIP),² and the number of persons who have selected a plan through the Marketplace. This report features cumulative data for the four-month period because some people apply, shop, and select a plan across monthly reporting periods.

The cumulative number of individuals that have selected a Marketplace plan between 10-1-13 and 2-1-14 (including those who have paid a premium and those who have not yet paid a premium) is 3.3 million.

¹ The previous Marketplace enrollment reports can be accessed at <http://www.aspe.hhs.gov/health/reports/2012/ACA-Research/index.cfm>.

² Data related to Medicaid and CHIP eligibility in this report are based on applications submitted through the Marketplaces. October through December data based on applications submitted through state Medicaid/CHIP agencies were released by the Centers for Medicare & Medicaid Services in a separate report, "*Medicaid & CHIP: December Monthly Applications and Eligibility Determinations Report, January, 22, 2014*," which can be accessed at <http://www.medicaid.gov/AffordableCareAct/Medicaid-Moving-Forward-2014/Downloads/December-2013-Enrollment-Report.pdf>. Comparable January 2014 enrollment data based on applications submitted through state Medicaid/CHIP agencies will be released in a subsequent report.

Figure 1 shows that, consistent with expectations,³ the proportion of young adults (ages 18 to 34) who have selected a Marketplace plan through the SBMs and FFM has continued to grow faster in the fourth month of the open enrollment period than in the prior three months, resulting in a 3 percentage point increase in the share of plan selections in the fourth month (27 percent) compared to the prior three months (24 percent).

Figure 1

Additionally, Table 1 shows that a similar trend was observed in both the SBMs and the FFM, which experienced 2 percentage point and 4 percentage point increases in the proportion of young adult Marketplace plan selections (ages 18 to 34) during the fourth month of the open enrollment period.

³ The general expectation is that people who are older and sicker are more likely to select coverage earlier in the initial enrollment period, while “younger and healthier people will tend to wait until towards the end of the open enrollment period (which concludes March 31, 2014).” “The Numbers Behind “Young Invincibles” and the Affordable Care Act,” Larry Levitt, Gary Claxton and Anthony Damico, Kaiser Family Foundation, December 17, 2013, available at <http://kff.org/health-reform/perspective/the-numbers-behind-young-invincibles-and-the-affordable-care-act/>.

Table 1

Trends in the Distribution of Marketplace Plan Selections By Age Group (based on data reported as of 2-10-14)	Cumulative Total, First Three Months 10-1-13 to 12-28-13		Change, Fourth Month Only 12-29-13 to 2-1-14		Cumulative Total, First Four Months 10-1-13 to 2-1-14	
	Number	% of Total	Number	% of Total	Number	% of Total

Total, All Ages	1,196,430	n/a	743,158	n/a	1,939,588	n/a

Note: These percentages are based on the total number of plan selections for which the applicable data are available, excluding plan selections with unknown data for age. (Source: Centers for Medicare & Medicaid Services, as of 2-10-2014.)

January Enrollment Growth

There was continued growth in total Marketplace plan selections in January, compared to the October-December period:

- **Marketplace Total (SBMs and FFM)** – there was a 53 percent increase in plan selections in January
 - the 2,153,400 cumulative number in October-December rose by 1,146,100 in January to a cumulative four month total of 3,299,500
- **SBMs** – there was a 42 percent increase in plan selections in January
 - the 957,000 cumulative number for October-December rose by 402,900 in January to a cumulative four month total of 1,359,900
- **FFM** – there was a 62 percent increase in plan selections in January
 - the 1,196,400 cumulative number in October-December rose by nearly 743,200 in January to a cumulative four month total of nearly 1,939,600

The following are highlights of Marketplace enrollment-related information for the first four months of the initial open enrollment period (see Appendix A, Appendix B and Appendix C for comparable state-level data).

Cumulative Highlights for the period: October 1, 2013 – February 1, 2013

Marketplace Eligibility Determinations and Plan Selection

- Number of Eligible Persons who have Selected a Plan through the SBMs and FFM: 3.3 million
- Number of Persons who have had a Medicaid/CHIP Determination or Assessment through the Marketplaces: 3.2 million (does not include individuals applying through State Medicaid/CHIP agencies.)

Marketplace Plan Selection by Gender

- 45 percent⁴ of the persons who have selected a Marketplace plan are male
- 55 percent of the persons who have selected a Marketplace plan are female

Marketplace Plan Selection by Age

- 25 percent of the persons who have selected a Marketplace plan are between the ages of 18 and 34
 - The percent of young adults who selected a Marketplace plan was 3 percentage points higher in January than it was from October through December (27 percent versus 24 percent)
- 31 percent of the persons who have selected a Marketplace plan are between the ages of 0 and 34

Marketplace Plan Selection by Metal Level

- 19 percent of the persons who have selected a Marketplace plan have selected a Bronze plan
- 62 percent of the persons who have selected a Marketplace plan have selected a Silver plan
- 12 percent of the persons who have selected a Marketplace plan have selected a Gold plan
- 7 percent of the persons who have selected a Marketplace plan have selected a Platinum plan
- 1 percent of the persons who have selected a Marketplace plan have selected a Catastrophic plan

Marketplace Plan Selection by Financial Assistance

- 82 percent of the persons who have selected a Marketplace plan have selected a Marketplace Plan with Financial Assistance⁵

FFM Marketplace Plan Selection by Gender and Age

- 26 percent of the males who have selected a Marketplace plan through the FFM are between 18 and 34
- 24 percent of the females who have selected a Marketplace plan through the FFM are between 18 and 34

FFM Marketplace Plan Selection by Gender and Metal Level

- 66 percent of the females who have selected a Marketplace plan through the FFM have selected a Silver plan
- 63 percent of the males who have selected a Marketplace plan through the FFM have selected a Silver plan

FFM Marketplace Plan Selection by Financial Assistance Status and Metal Level

- 72 percent of the persons who have selected a Marketplace plan with Financial Assistance through the FFM have selected a Silver plan
- 93 percent of the persons selecting a Silver plan in the FFM will be receiving Federal financial assistance in paying their premiums
- 25 percent of the persons who have selected a Marketplace plan without Financial Assistance through the FFM have selected a Silver plan
- 30 percent of the persons who have selected a Marketplace plan without Financial Assistance through the FFM have selected a Bronze plan

FFM Marketplace Plan Selection by Metal Level and Age

⁴ Based on the total number of plan selections for which the applicable data are available (excluding unknown).

⁵ Represents individuals who have selected a Marketplace plan, and qualify for an advance premium tax credit (APTC), with or without a cost-sharing reduction (CSR).

- 64 percent of the young adults between the ages of 18 and 34 who selected a Marketplace plan through the FFM selected a Silver plan
- 15 percent of the young adults between the ages of 18 and 34 who selected a Marketplace plan through the FFM selected a Bronze plan
- 11 percent of the young adults between the ages of 18 and 34 who selected a Marketplace plan through the FFM selected a Gold plan
- 6 percent of the young adults between the ages of 18 and 34 who selected a Marketplace plan through the FFM selected a Platinum plan
- 4 percent of the young adults between the ages of 18 and 34 who selected a Marketplace plan through the FFM selected a Catastrophic plan
 - Young adults account for 97 percent of all catastrophic plan selections through the FFM

Monthly Data on Marketplace Plan Selection – As shown in Figure 2, the cumulative number of persons who have selected a Marketplace plan has increased considerably since the end of the third month of the initial open enrollment period.

Figure 2

Additionally, Table 2 shows that the cumulative number of young adults (ages 18 to 34) selecting a Marketplace plan grew faster than for other age groups when the four month period is compared to the three month period. The cumulative number of young adults selecting a Marketplace plan has increased by 65 percent (318,055) since December 28th (from 489,460 to 807,515). By comparison, there was a 55 percent increase in Marketplace plan selections for all other age groups during the same time period (from 1.6 million to 2.4 million).

Table 2

Trend In the Cumulative Number of Marketplace Plan Selections By Age Group <i>(based on data reported as of 2-10-14)</i>	Cumulative Total, First Three Months 10-1-13 to 12-28-13	Cumulative Total, First Four Months 10-1-13 to 2-1-14	% Change
MARKETPLACE TOTAL			
Ages 18 to 34	489,460	807,515	65%
All Other Age Groups Combined	1,568,747	2,425,077	55%
<i>Subtotal With Available Data on Age</i>	2,058,207	3,232,592	57%
Marketplace Total	2,153,421	3,299,492	53%
SBM TOTAL			
Ages 18 to 34	212,909	327,096	54%
All Other Age Groups Combined	656,065	971,306	48%
<i>Subtotal With Available Data on Age</i>	868,974	1,298,402	49%
Marketplace Total	956,991	1,359,904	42%
FFM TOTAL			
Ages 18 to 34	276,551	480,419	74%
All Other Age Groups Combined	912,682	1,453,771	59%
<i>Subtotal With Available Data on Age</i>	1,189,233	1,934,190	63%
Marketplace Total	1,196,430	1,939,588	62%

Note: These percentages for Ages 18 to 34 and All Other Age Groups Combined are based on the total number of plan selections for which the applicable data are available, excluding plan selections with unknown data for age.

Source: Centers for Medicare & Medicaid Services, as of 2-10-2014.

- **Marketplace Plan Selections by Age** – The proportion of Marketplace plan selections by persons between the ages of 18 and 34 has been increasing. Persons between the ages of 18 and 34 account for nearly a quarter (25 percent) of all Marketplace plan selections (SBMs and FFM) for the first four months of the initial open enrollment period (compared to 24 percent during the first three months of the initial open enrollment, and 27 percent during the month of January).
 - SBMs: 25 percent between the ages of 18 and 34 (10-1-13 to 2-1-14).
 - FFM: 25 percent between the ages of 18 and 34 (10-1-13 to 2-1-14).

Table 3 shows the age distribution of the Marketplace plan selections (SBMs and FFM) during the first four months of the initial open enrollment period.

Table 3

Comparison of the Age Distribution of Marketplace Plan Selections (SBM & FFM) For the Four Month period: 10-1-13 to 2-1-14 (based on data reported as of 2-10-14)	Percent of Total Individuals Who Have Selected a Marketplace Plan (1)
Age < 18	6%
Age 18-25	9%
Age 26-34	16%
Age 35-44	16%
Age 45-54	22%
Age 55-64	31%
Age ≥65 ⁶	0%
Total	100%
Ages 18 to 34	25%

(1) These percentages are based on the total number of plan selections for which the applicable data are available, excluding plan selections with unknown data for age. (Source: Centers for Medicare & Medicaid Services, as of 2-10-2014.)

Consumer Shopping – Marketplace plan selection is expected to continue to grow. Consumer interest in gaining health coverage continues to be strong among Americans who currently lack insurance—63 percent say they are likely to get health insurance in 2014.⁷ Additionally, interest in the Marketplace is strong and growing. A majority of adults (63 percent) who are potentially eligible to enroll in coverage through a qualified health plan or Medicaid said they were aware of the Health Insurance Marketplace as a place where they might shop for coverage. Twenty-four percent of those potentially eligible reported that they had visited the Marketplace to shop for a plan by December, whether online, by phone, in person, or by mail, up from 17 percent in October.⁸ As noted in the October enrollment report, other programs such as Medicare Part D, employer sponsored insurance, and FEHBP have experienced a surge of enrollment as their respective open enrollment periods came to an end. A similar enrollment surge is expected for the end of the initial open enrollment period for the Marketplace.

Overview of Enrollment-Related Activity to Date

Selected a Marketplace Plan – To date, 3.3 million persons have selected a Marketplace plan during the first four months of the initial open enrollment period, including 1.4 million in SBMs and 1.9 million in the FFM (these numbers include those who have paid a premium and those who have not yet paid a premium, regardless of when their coverage begins).

⁶ There are nearly 400,000 uninsured persons over the age of 65; some persons over 65 have selected Marketplace plans.

⁷ Gallup daily tracking poll, December 3, 2012, accessed at http://www.gallup.com/poll/166115/one-four-uninsured-plan-remain.aspx?utm_source=alert&utm_medium=email&utm_campaign=syndication&utm_content=morelink&utm_term=Well-Being.

⁸ Sara R. Collins et. al., *The Commonwealth Fund*, Americans' Experiences in the Health Insurance Marketplaces: Results from the First Three Months, January 2014.

The following are additional highlights of the preliminary data on the characteristics of Marketplace plan selections during the first four months of the initial open enrollment period (see Appendix A for national and state-level tables).⁹

- **Marketplace Plan Selections by Gender** – The gender distribution of Marketplace plan selections has remained constant. More than half of the people who have selected a Marketplace plan through the SBMs and FFM during the first four months of the initial open enrollment period are female (55 percent of the total for the Marketplace as a whole, excluding plan selections where gender is unknown), while the remaining 45 percent are male. The comparable proportions for the first three months of the initial open enrollment period were 54 percent and 46 percent, respectively.
 - SBMs: 53 percent female, 47 percent male (10-1-13 to 2-1-14).
 - FFM: 56 percent female, 44 percent male (10-1-13 to 2-1-14).

By comparison, males account for half (50 percent) of the total non-elderly population in the United States (ages 0 to 64).¹⁰

- **Marketplace Plan Selections by Metal Level** – The proportion of Silver Marketplace plan selections has increased. Silver plans account for more than half (62 percent) of the Marketplace plan selections in the SBMs and FFM between 10-1-13 and 2-1-14 (compared with 60 percent during the first three months of the initial enrollment period).
 - SBMs: 58 percent Silver (10-1-13 to 2-1-14).
 - FFM: 65 percent Silver (10-1-13 to 2-1-14).

The metal level distribution of the remaining Marketplace plan selections (SBMs and FFM) are as follows: bronze (19 percent), gold (12 percent), platinum (7 percent), and catastrophic (1 percent).

- **Marketplace Plan Selections by Financial Assistance Status** – The proportion of Marketplace plan selections with financial assistance (i.e., Marketplace plan selections by individuals who are eligible to receive financial assistance) has also increased. Based on data for the first four months of the initial open enrollment period, more than eight out of ten (82 percent) of the people who have selected a Marketplace plan through the SBMs and FFM are eligible to receive Federal financial assistance in paying their premiums.¹¹ The comparable proportion for the first three months of the initial open enrollment period was 79 percent.

⁹ The percentages cited in this section are based on the total number of plan selections for which the applicable data are available, excluding plan selections with unknown data for a given metric (e.g., age, gender, metal level, etc.) Aggregate data on the total number of plan selections with available data for a given metric, and the corresponding number of plan selections with unknown data for a given metric can be found in Appendix Table A1.

¹⁰ ASPE analysis of the 2010-2012 Current Population Survey Annual Social and Economic Supplement (CPS ASEC, covering calendar years 2009-2011), adjusted using ASPE's TRIM3 microsimulation to include only estimated nonelderly U.S. citizens and others lawfully present.

¹¹ This includes people who qualify for an advance premium tax credit (APTC), with or without a cost-sharing reduction (CSR).

- SBMs: 79 percent in Marketplace plans with financial assistance (10-1-13 to 2-1-14).
- FFM: 83 percent in Marketplace plans with financial assistance (10-1-13 to 2-1-14).

Tax credits for premium assistance may be available to individuals with family incomes between 100 and 400 percent of the Federal Poverty Level (138 to 400 percent of FPL in states taking the Federally-funded option to expand Medicaid). These percentages are consistent with previous estimates.¹²

Additional Characteristics of FFM Marketplace Plan Selections – The following are highlights of preliminary data on additional characteristics of FFM Marketplace plan selections, based on cross-tabulations of the abovementioned metrics (see Appendix B for national and state-level tables).

- ***FFM Marketplace Plan Selections by Gender and Age***
 - Young adults (ages 18-34) accounted for 26 percent of all males selecting Marketplace plans through the FFM, compared with 24 percent of all females selecting Marketplace plans through the FFM, and 25 percent of all FFM Marketplace plan selections as a whole.
 - Meanwhile, males between the ages of 0 and 34 accounted for nearly a third (32 percent) of all males selecting Marketplace plans through the FFM, compared with 29 percent for females, and 30 percent for all persons who selected a Marketplace plan through the FFM.
- ***FFM Marketplace Plan Selections by Gender and Metal Level***
 - Females were more likely to select Silver plans in the FFM (66 percent versus 63 percent for males).
 - Males were more likely to select Bronze plans in the FFM (17 percent versus 15 percent for females).
- ***FFM Marketplace Plan Selections by Financial Assistance Status and Metal Level***
 - Persons selecting a Marketplace plan who are eligible to receive financial assistance were more likely to select Silver plans in the FFM (72 percent versus 25 percent for persons selecting a Silver Marketplace plan without financial assistance).
 - Persons selecting a Marketplace plan without financial assistance were more likely to select Bronze plans in the FFM than other metal levels (30 percent versus 13 percent for persons selecting a Marketplace plan with financial assistance). They were also more likely to select gold, platinum and catastrophic plans than

¹² For example, the Congressional Budget Office (CBO) estimates for CY 2014 were as follows: 6 million subsidized / 7 million total in Marketplace = 86% with financial assistance. (Source: "Effects on Health Insurance and the Federal Budget for the Insurance Coverage Provisions in the Affordable Care Act—May 2013 Baseline," May 14, 2013, accessed at http://www.cbo.gov/sites/default/files/cbofiles/attachments/44190_EffectsAffordableCareActHealthInsuranceCoverage_2.pdf.)

were persons who are eligible to receive financial assistance.

- More than nine out of ten (93 percent) of the persons selecting a Silver plan in the FFM are eligible to receive Federal financial assistance in paying their premiums.
- **FFM Marketplace Plan Selections by Metal Level and Age**
 - Among young adults (ages 18 to 34), 64 percent selected a Silver plan, while 15 percent selected a Bronze plan, 11 percent selected a Gold plan, 6 percent selected a Platinum plan, and 4 percent selected a Catastrophic plan.
 - Nearly one out of three (30 percent) of the nearly 421,400 persons who selected a standalone dental plan through the FFM are young adults (ages 18-34).

Table 4

Cumulative Marketplace Enrollment-Related Information For the Four Month period: 10-1-13 to 2-1-14 (1) (based on data reported as of 2-10-14)	Marketplace Total	SBM Total	FFM Total
Visits on the Marketplace websites	63,921,542	19,557,165	44,364,377
Calls to the Marketplace call centers	15,707,711	5,045,180	10,662,531
Number of individuals who have selected a Marketplace plan	3,299,492	1,359,904	1,939,588
<i>Males who have selected a Marketplace plan (2)</i>	45%	47%	44%
<i>18 to 34 year olds who have selected a Marketplace plan (2)</i>	25%	25%	25%
<i>Individuals who have selected a Silver Marketplace plan (2)</i>	62%	58%	65%
<i>Individuals who have selected a Marketplace plan with financial assistance (2)</i>	82%	79%	83%

(1) The reporting period is for the first 4 months is from 10-1-13 to 2-1-14. Any differences in reporting periods among states are noted in footnotes accompanying the Table in Appendix C. See Appendix D for methodological information. Visitors to the Marketplace websites is the sum of monthly data and has been unduplicated to the extent possible; however, we do not believe that all duplication has yet been removed.

(2) Percentages shown in this table are based on the total number of plan selections for which the applicable data are available, excluding plan selections with unknown data for a given metric (e.g., age, gender, etc.)

Source: Centers for Medicare & Medicaid Services, as of 2-10-2014.

Web Site and Call Center Volume – Interest in the Marketplaces continues to be high, as measured by visits on the SBM and FFM websites (nearly 64 million),¹³ and calls to the SBM and FFM call centers (nearly 16 million) through the end of January.)

Methodological Overview

The data reported here have been generated by the information systems of the Centers for Medicare & Medicaid Services (CMS), based on information reported to CMS by SBMs, and information collected by the FFM for states with HHS-supported or fully run Marketplaces (including those run in partnership with states). Data for certain metrics are not yet available for some SBM states due to information system issues. (Please refer to Appendix D for additional methodological information.)

¹³ Not all SBMs have provided updated data on website and call center activity through 2-1-14. In addition, duplication has been removed from the data on the cumulative number of website visitors to the extent possible; however, we do not believe that all duplication has been removed.

As discussed earlier, this report includes cumulative data for the four-month period (10-1-13 to 2-1-14) because some people apply, shop, and select a plan across more than one monthly reporting period. To the extent possible, these counts seek to avoid potential duplication associated with monthly reporting.

This report also includes preliminary data on the characteristics of persons who have selected a Marketplace plan (by gender, age, metal level, and financial assistance status for the SBMs and FFM; and for the FFM, by gender and age, gender and metal level, financial assistance status and metal level, and metal level and age). In some cases, the data for certain characteristics of Marketplace plan selections are not yet available.

We believe that the information contained in this issue brief provides the most systematic “snapshot” of enrollment-related activity in the Marketplaces to date because the data for the various metrics are counted using comparable definitions for data elements across states, and between the SBMs and FFM. **It is important to note that the SBM enrollment-related data that are reported in this issue brief represent state data that have been reported to CMS through February 10, 2014, and may differ from comparable data that have previously been publicly reported on SBM websites or in media reports because that data may be based on different time periods or metric definitions from those used in this report.**

Notes:

Percentages in this table have been rounded. Some numbers may not add to totals due to rounding.

(1) Unless otherwise noted, the data in this table represent cumulative Marketplace enrollment-related activity for 10/1/13 to 2/1/14. For additional methodological information, please refer to Appendix D of this report.

(2) For each metric, the data represent the total number of Individuals Determined Eligible to Enroll in a plan Through the Marketplace who have selected a plan (with or without the first premium payment having been received directly by the Marketplace or the issuer) during the reference period, excluding plan selections with unknown data for a given metric. This is also known as pre-effectuated enrollment.

(3) In some cases, the data for certain characteristics of Marketplace plan selections are not yet available. For this reason, for each metric, we have calculated the comparable percentages based on the number of plan selections with known data for that metric.

(4) The FFM subtotals for each metal tier type do not sum to the total number of Plan Selections With Available Data on Metal Level due to instances where consumers enrolled in more than one plan type in their state (for example, some consumers may have enrolled in both a health plan and a standalone dental plan). As a result, the corresponding percentages also do not sum to 100 percent. This also affects the data for the Marketplace total. To the extent possible, duplication associated with standalone dental plan selection has been removed from the data shown in this table.

MARKETPLACE TOTAL, All States	3,299,492	3,268,271	55%	45%

Notes:

“N/A” means that the data for the respective metric is not yet available for a given state. Percentages in this table have been rounded. Some numbers may not add to totals due to rounding.

(1) Unless otherwise noted, the data in this table represent cumulative Marketplace enrollment-related activity for 10/1/13 to 2/1/14. For additional methodological information, please refer to Appendix D of this report.

(2) For each metric, the data represent the total number of Individuals Determined Eligible to Enroll in a plan Through the Marketplace who have selected a plan (with or without the first premium payment having been received directly by the Marketplace or the issuer) during the reference period, excluding plan selections with unknown data for a given metric. This is also known as pre-effectuated enrollment.

(3) In some cases, the data for certain characteristics of Marketplace plan selections are not yet available. For this reason, for each metric, we have calculated the comparable percentages based on the number of plan selections with known data for that metric.

(4) For Nevada, the cumulative number of individuals who have selected a Marketplace plan through 2/1/14 (22,597) represents a 5,379 increase over the revised cumulative Marketplace plan selection number for the 10/1/13 to 12/28/13 reporting period (17,218). The previous three-month Marketplace plan selection number that was reported in the January Marketplace Enrollment Report for Nevada was overstated.

(5) Oregon's enrollment data distributions by gender are estimates based on analysis of enrollment files sent to issuers through December 31, 2013. The total rolls up to actual total QHP enrolled (plan selection) individuals, less some individuals for whom data were unavailable. Cover Oregon will update with actuals as soon as its electronic reporting application is configured and tested to accurately report enrollment breakouts.

(6) Idaho and New Mexico are Federally supported SBMs for 2014; they are using the FFM platform for 2014.

Notes:

“N/A” means that the data for the respective metric is not yet available for a given state. Percentages in this table have been rounded. Some numbers may not add to totals due to rounding.

(1) Unless otherwise noted, the data in this table represent cumulative Marketplace enrollment-related activity for 10/1/13 to 2/1/14. For additional methodological information, please refer to Appendix D of this report.

(2) For each metric, the data represent the total number of Individuals Determined Eligible to Enroll in a plan Through the Marketplace who have selected a plan (with or without the first premium payment having been received directly by the Marketplace or the issuer) during the reference period, excluding plan selections with unknown data for a given metric. This is also known as pre-effectuated enrollment.

(3) In some cases, the data for certain characteristics of Marketplace plan selections are not yet available. For this reason, for each metric, we have calculated the comparable percentages based on the number of plan selections with known data for that metric.

(4) Kentucky's age distributions are for data submitted for the period of 12/21/13 through 2/1/14.

(5) Massachusetts' enrollment data distributions are for the time period of 10/1/2013 - 1/25/2014.

(6) For Nevada, the cumulative number of individuals who have selected a Marketplace plan through 2/1/14 (22,597) represents a 5,379 increase over the revised cumulative Marketplace plan selection number for the 10/1/13 to 12/28/13 reporting period (17,218). The previous three-month Marketplace plan selection number that was reported in the January Marketplace Enrollment Report for Nevada was overstated.

(7) Idaho and New Mexico are Federally supported SBMs for 2014; they are using the FFM platform for 2014.

MARKETPLACE TOTAL, All States	3,299,492	3,271,788	19%	62%	12%	7%	1%

Notes:

“N/A” means that the data for the respective metric is not yet available for a given state. Percentages in this table have been rounded. Some numbers may not add to totals due to rounding.

(1) Unless otherwise noted, the data in this table represent cumulative Marketplace enrollment-related activity for 10/1/13 to 2/1/14. For additional methodological information, please refer to Appendix D of this report.

(2) For each metric, the data represent the total number of Individuals Determined Eligible to Enroll in a plan Through the Marketplace who have selected a plan (with or without the first premium payment having been received directly by the Marketplace

or the issuer) during the reference period, excluding plan selections with unknown data for a given metric. This is also known as pre-effectuated enrollment.

(3) In some cases, the data for certain characteristics of Marketplace plan selections are not yet available. For this reason, for each metric, we have calculated the comparable percentages based on the number of plan selections with known data for that metric.

(4) The FFM subtotals for each metal tier type do not sum to the total number of Plan Selections With Available Data on Metal Level due to instances where consumers selected more than one plan type in their state (for example, some consumers have enrolled in both a health plan and a standalone dental plan). As a result, the corresponding percentages also do not sum to 100 percent. This also affects the data for the Marketplace total. To the extent possible, duplication associated with standalone dental plan selection has been removed from the data shown in this table.

(5) Kentucky - Kentucky's enrollment data distributions by metal level are for the time period of 12/21/13 through 2/1/14.

(6) Massachusetts - Massachusetts' enrollment data distributions by metal level are for the time period of 10/1/13 - 1/25/14.

(7) For Nevada, the cumulative number of individuals who have selected a Marketplace plan through 2/1/14 (22,597) represents a 5,379 increase over the revised cumulative Marketplace plan selection number for the 10/1/13 to 12/28/13 reporting period (17,218). The previous three-month Marketplace plan selection number that was reported in the January Marketplace Enrollment Report for Nevada was overstated.

(8) Oregon - Oregon's enrollment data distributions by metal level are estimates based on analysis of enrollment files sent to issuers through December 31, 2013. The total rolls up to actual total QHP enrolled (plan selection) individuals, less some individuals for whom data were unavailable. Cover Oregon will update with actuals as soon as its electronic reporting application is configured and tested to accurately report enrollment breakouts.

(9) Idaho and New Mexico are Federally supported SBMs for 2014; they are using the FFM platform for 2014.

Ages 0 to 34	144,471	25%

Notes:

Percentages in these tables table have been rounded. Some numbers may not add to totals due to rounding.

(1) Unless otherwise noted, the data in these tables represent cumulative FFM Marketplace enrollment-related activity for 10/1/13 to 2/1/14. For additional methodological information, please refer to Appendix D of this report.

(2) For each metric, the data represent the total number of Individuals Determined Eligible to Enroll in a plan Through the Marketplace who have selected a plan through the FFM (with or without the first premium payment having been received directly by the Marketplace or the issuer) during the reference period, excluding plan selections with unknown data for a given metric. This is also known as pre-effectuated enrollment.

- (3) In some cases, the data for certain characteristics of Marketplace plan selections are not yet available. For this reason, for each metric, we have calculated the comparable percentages based on the number of plan selections with known data for that metric.
- (4) Represents the vertical percentage for the data that are being shown based on a given set of metrics. For example, if the rows show Age Groups and the columns show Gender, then this percentage represents the data for a given Age Group / Gender combination as a percentage of the comparable Gender total for all Age Groups (e.g., Persons between the ages of 18 and 34 represent X percent of the all of the Female Marketplace Plan selections).
- (5) Represents the horizontal percentage of the data that are being shown based on a given set of metrics. For example, if the rows show Age Groups and the columns show Gender, then this percentage represents the data for a given Age Group / Gender combination as a percentage of the comparable Age Group total for all Genders (e.g., Females represent X percent of the Marketplace Plan selections for persons between the ages of 18 and 34).
- (6) The FFM subtotals for each metal tier type do not sum to the total number of Plan Selections With Available Data on Metal Level due to instances where consumers enrolled in more than one plan type in their state (for example, some consumers may have enrolled in both a health plan and a standalone dental plan). As a result, the corresponding percentages also do not sum to 100 percent. This also affects the data for the Marketplace total. To the extent possible, duplication associated with standalone dental plan selection has been removed from the data shown in this table.

APPENDIX TABLE B2

Notes:

“N/A” means that the data for the respective metric is not yet available for a given state. Percentages in this table have been rounded. Some numbers may not add to totals due to rounding.

(1) Unless otherwise noted, the data in this table represent cumulative Marketplace enrollment-related activity for 10/1/13 to 2/1/14. For additional methodological information, please refer to Appendix D of this report.

(2) For each metric, the data represent the total number of Individuals Determined Eligible to Enroll in a plan Through the Marketplace who have selected a plan through the FFM (with or without the first premium payment having been received directly by the Marketplace

or the issuer) during the reference period, excluding plan selections with unknown data for a given metric. This is also known as pre-effectuated enrollment.

(3) In some cases, the data for certain characteristics of Marketplace plan selections are not yet available. For this reason, for each metric, we have calculated the comparable percentages based on the number of plan selections with known data for that metric.

(4) Idaho and New Mexico are Federally supported SBMs for 2014; they are using the FFM platform for 2014.

Notes:

“N/A” means that the data for the respective metric is not yet available for a given state. Percentages in this table have been rounded. Some numbers may not add to totals due to rounding.

(1) Unless otherwise noted, the data in this table represent cumulative Marketplace enrollment-related activity for 10/1/13 to 2/1/14. For additional methodological information, please refer to Appendix D of this report.

(2) For each metric, the data represent the total number of Individuals Determined Eligible to Enroll in a plan Through the Marketplace who have selected a plan (with or without the first premium payment having been received directly by the Marketplace

or the issuer) during the reference period, excluding plan selections with unknown data for a given metric. This is also known as pre-effectuated enrollment.

(3) In some cases, the data for certain characteristics of Marketplace plan selections are not yet available. For this reason, for each metric, we have calculated the comparable percentages based on the number of plan selections with known data for that metric.

(4) The FFM subtotals for each metal tier type do not sum to the total number of Plan Selections With Available Data on Metal Level due to instances where consumers enrolled in more than one plan type in their state (for example, some consumers may have enrolled in both a health plan and a standalone dental plan). As a result, the corresponding percentages also do not sum to 100 percent. This also affects the data for the Marketplace total. To the extent possible, duplication associated with standalone dental plan selection has been removed from the data shown in this table.

(5) Idaho and New Mexico are Federally supported SBMs for 2014; they are using the FFM platform for 2014.

APPENDIX TABLE B4

FFM Marketplace Plan Selection by Financial Assistance Status, Metal Level and State (1) 10-1-2013 to 2-1-2014							
Description	Individuals Who Have Selected a Marketplace Plan With Financial Assistance (2)	Number With Available Data on Metal Level (3)	With Financial Assistance By Metal Level (4) (% of Available Data, Excluding Unknown)

Notes:

“N/A” means that the data for the respective metric is not yet available for a given state. Percentages in this table have been rounded. Some numbers may not add to totals due to rounding. Data distributions for States with very small numbers of Marketplace plan selections for a given metal level have been suppressed.

(1) Unless otherwise noted, the data in this table represent cumulative Marketplace enrollment-related activity for 10/1/13 to 2/1/14. For additional methodological information, please refer to Appendix D of this report.

(2) For each metric, the data represent the total number of Individuals Determined Eligible to Enroll in a plan Through the Marketplace who have selected a plan (with or without the first premium payment having been received directly by the Marketplace or the issuer) during the reference period, excluding plan selections with unknown data for a given metric. This is also known as pre-effectuated enrollment.

(3) In some cases, the data for certain characteristics of Marketplace plan selections are not yet available. For this reason, for each metric, we have calculated the comparable percentages based on the number of plan selections with known data for that metric.

(4) Idaho and New Mexico are Federally supported SBMs for 2014; they are using the FFM platform for 2014.

APPENDIX C

TOTAL MARKETPLACE ELIGIBILITY DETERMINATIONS, AND MARKETPLACE PLAN SELECTIONS BY MARKETPLACE TYPE AND STATE, 10-1-2013 TO 2-1-2014

Florida	748,434	436,222	99,746	296,892
Georgia	272,262	136,594	51,531	101,276
Illinois	203,922	120,852	115,628	88,602
Indiana	111,792	72,029	60,431	47,735
Iowa	33,511	19,661	25,566	11,788
Kansas	52,997	28,296	8,944	22,388

**Total Marketplace Eligibility Determinations, and
Marketplace Plan Selections By Marketplace Type and State (1) (2)**

10-1-2013 to 2-1-2014

State Name	Number of Individuals Determined Eligible to Enroll in a Marketplace Plan		Determined or Assessed Eligible for Medicaid / CHIP by the Marketplace (5)	Number of Individuals Who Have Selected a Marketplace Plan (6)
	Total Eligible to Enroll in a Marketplace Plan (3)	Eligible to Enroll in a Marketplace Plan with Financial Assistance (4)		
	Number	Number	Number	Number
Louisiana	84,725	44,559	7,591	32,864
Maine	39,523	25,842	4,803	20,511
Michigan	255,055	147,654	34,032	112,013
Mississippi	51,953	25,638	6,887	17,350
Missouri	134,931	73,363	27,286	54,157
Montana	33,948	22,687	3,258	18,649
Nebraska	45,665	28,744	9,360	20,407
New Hampshire	35,781	19,514	4,734	16,863
New Jersey	148,752	84,223	104,689	54,805
North Carolina	326,120	204,794	48,451	160,161
North Dakota	8,405	5,531	4,071	4,057
Ohio	159,694	91,285	78,575	60,122
Oklahoma	63,357	32,119	9,750	24,667
Pennsylvania	286,926	154,414	29,365	123,681
South Carolina	109,313	58,677	16,425	41,300
South Dakota	13,000	7,713	2,420	5,077
Tennessee	163,734	82,649	41,743	59,705
Texas	586,342	301,708	80,368	207,546
Utah	61,518	42,713	31,646	29,419
Virginia	200,865	100,248	27,860	74,199
West Virginia	20,204	12,373	14,879	7,962
Wisconsin	133,006	86,982	60,085	56,436
Wyoming	11,864	7,625	1,427	5,307
FFM Subtotal	4,778,942	2,698,891	1,168,010	1,939,588
MARKETPLACE TOTAL, All States	7,267,230	4,156,600	3,181,155	3,299,492

Notes:

“N/A” means that the data for the respective metric is not yet available for a given state.

(1) Unless otherwise noted, the data in this table represent cumulative Marketplace enrollment-related activity for 10/1/13 to 2/1/14. For additional methodological information, please refer to Appendix D of this report.

(2) We are no longer showing data on the total number of completed applications and total number of individuals applying for coverage in completed applications in this table because we believe that there is duplication in these metrics.

(3) “Individuals Determined Eligible to Enroll in a Plan Through the Marketplace” (i.e., a Marketplace plan) represents the total number of individuals for whom a Completed Application has been received and who are determined to be eligible for plan enrollment through the Marketplace during the reference period, whether or not they qualify for advance payments of the premium tax credit or cost-sharing reductions. These individuals may or may not have enrolled in coverage by the end of the reference period. Individuals who have been determined or assessed eligible for Medicaid or CHIP are not included.

(4) “Individuals Determined Eligible to Enroll in a Plan Through the Marketplace with Financial Assistance” represents the total number of individuals determined eligible to enroll in a Marketplace plan who qualify for an advance premium tax credit (APTC), with or without a cost-sharing reduction (CSR).

(5) “Individuals Determined or Assessed Eligible for Medicaid / CHIP by the Marketplace” represents the number of individuals who have been determined or assessed by the Marketplace as eligible for Medicaid or CHIP, based on modified adjusted gross income (MAGI). In some states, Completed Applications for individuals, whom the Marketplace has assessed as potentially eligible for Medicaid or CHIP, based on MAGI, are transferred to the relevant state agency for a final eligibility determination. In these “assessment states” the data include those accounts where a final decision is pending. In other states, the Marketplace has been delegated the final Medicaid/CHIP determination responsibility for these individuals. Thus, this data element includes FFM determinations and assessments, regardless of the state Medicaid/CHIP agency’s final eligibility determination. These data may vary from accounts transferred via ‘flat file’ to states by the FFM. Quality assurance continues on Medicaid assessments and determinations in advance of transfers to states and these figures might alter further based on that review. Note: this data element does not include eligibility determinations made by State Medicaid/CHIP agencies based on applications originally submitted to the State agency or other Medicaid/CHIP assessments or determinations.

(6) “Individuals Who Have Selected a Marketplace plan” represents the total number of “Individuals Determined Eligible to Enroll in a plan Through the Marketplace” who have selected a plan (with or without the first premium payment having been received directly by the Marketplace or the issuer) during the reference period. This is also known as pre-effectuated enrollment.

(7) Because the Colorado Marketplace does not have an integrated eligibility system, application and eligibility data pertain only to QHP assessments, while data for “Individuals Assessed Eligible for Medicaid/CHIP” are not available. In addition, the “Number of Individuals Applying for Coverage through the Marketplace” does not include individuals who are determined eligible for Medicaid/CHIP. The Colorado Marketplace is unable to provide data on these applicants, as individuals are only permitted to complete a QHP application if they are determined ineligible for Medicaid/CHIP.

(8) Because the Hawaii Marketplace’s eligibility system is not integrated with its state Medicaid department, the data for “Individuals Assessed Eligible for Medicaid/CHIP” are not available at this time. In addition, the Marketplace is in the process of receiving data from the state Medicaid department on applicants who have been determined ineligible for Medicaid or CHIP. It is anticipated that the proportion of QHP eligible individuals with Financial Assistance will increase as these applicants are transferred from the Medicaid agency to the Marketplace.

(9) For Kentucky, the totals for “Individuals Determined Eligible to Enroll in a Marketplace Plan” and “Individuals Determined or Assessed Eligible for Medicaid/CHIP” have not been reconciled to eliminate duplicates, and thus may be overestimates.

(10) Massachusetts data for “Number of Individuals Enrolled in a QHP (Plan Selection)” data is for the time period 10/1/13 through 1/23/14, and “Number of Individuals Enrolled in a QHP (Effectuated Enrollment)” is for the time period 10/1/13 through 1/28/13. In addition, Massachusetts has not submitted updated data for “Number of Individuals Applying for Coverage Through the Marketplace” or “Number of Individuals Determined Eligible for Enrollment into a QHP” since the time period ending on 11/30/13. Because the Massachusetts Marketplace does not process eligibility (MAGI) determinations for Medicaid or CHIP, data for “Individuals Determined or Assessed Eligible for Medicaid/CHIP” are not available. Massachusetts’s “Total Number of Completed Applications” does not include completed paper applications because these data are not yet available.

(11) Minnesota’s cumulative data for “Individuals Determined Eligible to Enroll in a Marketplace Plan,” “Individuals Determined Eligible to Enroll in a Marketplace Plan with Financial Assistance,” and “Individuals Who Have Selected a Marketplace Plan” do not include adults between 133% and 200% of the Federal Poverty Level (FPL) because these individuals are enrolled in the MinnesotaCare program. In addition, children up to 275% FPL are covered through the Medicaid program. Hence, when comparing Minnesota’s cumulative data for these indicators with other State-Based Marketplaces, the number of individuals determined eligible for MinnesotaCare and enrolled in MinnesotaCare are worth noting.

(12) For Nevada, the cumulative number of individuals who have selected a Marketplace plan through 2/1/14 (22,597) represents a 5,379 increase over the revised cumulative Marketplace plan selection number for the 10/1/13 to 12/28/13 reporting period (17,218). The previous three-month Marketplace plan selection number that was reported in the January Marketplace Enrollment Report for Nevada was overstated.

(13) Oregon’s data for “Total Eligible with APTC” is an estimate based on analysis of enrollment files sent to issuers through December 31, 2013. The total rolls up to actual total QHP eligible individuals. Cover Oregon will update with actuals as soon as its electronic reporting application is configured and tested to accurately report determinations.

(14) For Vermont, the totals for “Individuals Determined Eligible to Enroll in a Marketplace Plan” and “Individuals Determined or Assessed Eligible for Medicaid/CHIP” may include duplicates, and thus may be overestimates.

(15) Idaho and New Mexico are Federally supported SBMs for 2014; they are using the FFM platform for 2014.

APPENDIX D: METHODOLOGY AND TECHNICAL NOTES

The data that are reported in this issue brief have been generated by the information systems of the Centers for Medicare & Medicaid Services, based on information reported to CMS by SBMs, and information collected by the FFM for states with Marketplaces supported by or fully run by HHS (including those run in partnership with states).

Unless otherwise noted, the data in this issue brief represent cumulative Marketplace enrollment-related activity for the 10-1-13 to 2-1-14 reporting period, with information available as of 2-10-14.

We believe that the information contained in this issue brief provides the most systematic “snapshot” of enrollment-related activity in the Marketplaces to date because the data for the various metrics are counted using comparable definitions for data elements across states, and between the SBMs and FFM (see table below). **It is important to note that the SBM enrollment-related data that are reported in this issue brief represent state data that have been reported to CMS through February 10, 2014, and may differ from comparable data that have previously been publicly reported on SBM websites or in media reports because that data may be based on different time periods or metric definitions from those used in this report.**

While this issue brief includes some data for all states, data for certain metrics are not available for some states due to information system issues. For example, CMS did not receive data on some metrics for certain states, as noted in Appendix A, Appendix B and Appendix C.

The following section provides highlights of major methodological changes since the January Marketplace Enrollment Report. For additional technical information about the metrics that are included in this report, please refer to the earlier Marketplace enrollment reports.¹⁴

Highlights of Major Methodological Changes Since the January Marketplace Enrollment Report

Reporting of Cumulative Four-Month Data - This report includes cumulative data for the four-month period (10-1-13 to 2-1-14) because some people’s process of applying, shopping, and selecting a plan may span across multiple monthly reporting periods (for example, a person may have applied for a Marketplace plan in October and then selected a Marketplace plan in December). We believe that these cumulative data provide the best “snapshot” of Marketplace enrollment-related activity to date. Ongoing efforts are underway to eliminate duplication associated with counting people in more than one month. Additionally, some SBM data systems are still working to eliminate duplication in their cumulative counts, so all duplication has not yet been removed in this report.

Data on Total Number of Completed Applications and Total Individuals Applying for Coverage in Completed Applications – We are no longer showing data on the total number of completed applications and total number of individuals applying for coverage in completed applications in Appendix C and in the main body of this report because we believe that there is duplication in these metrics.

¹⁴ The previous Marketplace Enrollment Reports can be accessed at <http://www.aspe.hhs.gov/health/reports/2012/ACA-Research/index.cfm>.

Data on the Number of Individuals Determined or Assessed Eligible for Medicaid/CHIP by the Marketplace – The data for this metric increased at a faster rate than some of the other metrics due to the inclusion of updated data for California (the previous report only contained data for California through November 2013).

SBM Data – Not all SBMs have provided updated data on website and call center activity through 2-1-14. For Nevada, the cumulative number of individuals who have selected a Marketplace plan through 2/1/14 (22,597) represents a 5,379 increase over the revised cumulative Marketplace plan selection number for the 10/1/13 to 12/28/13 reporting period (17,218). The previous three-month Marketplace plan selection number that was reported in the January Marketplace Enrollment Report for Nevada was overstated. For additional state-specific technical notes, please see the footnotes of the tables in Appendix A, Appendix B, and Appendix C.

Data on Characteristics of Marketplace Plan Selections by Metal Level – The FFM subtotals for each metal tier type do not sum to the total number of Plan Selections With Available Data on Metal Level due to instances where consumers enrolled in more than one plan type in their state (for example, some consumers may have enrolled in both a health plan and a standalone dental plan). As a result, the corresponding percentages also do not sum to 100 percent. This also affects the data for the Marketplace total. For the February enrollment report, to the extent possible, duplication associated with standalone dental plan selection has been removed from the data shown for each metal tier type. Additionally, separate totals for standalone dental plan selections are shown separately where appropriate. Data distributions for States with very small numbers of Marketplace plan selections for a given metal level have been suppressed.

Standalone Dental Plan Selection – For the FFM, total standalone dental plan selections includes data for both the “High” and “Low” standalone dental plan metal tier types. For the SBMs, separate data are not yet available on standalone dental plan selections.

Data on Additional Characteristics of FFM Marketplace Plan Selections – This report also includes preliminary additional data on the characteristics of persons who have selected a Marketplace plan through the FFM (by Gender and Age; Gender and Metal Level; Financial Assistance Status and Metal Level; and Metal Level and Age). In some cases, the data for certain characteristics of Marketplace plan selections are not yet available. For this reason, for each metric, we have calculated the comparable percentages based on the number of plan selections with known data for that metric.

APPENDIX TABLE D1

Summary of Marketplace Monthly Enrollment-Related Information By Marketplace Type (10-1-13 to 2-1-14)	Marketplaces Total (SBMs and FFMs)		States Implementing Their Own Marketplaces (SBMs)		States With Marketplaces that are Supported by or Fully-Run by HHS (FFM)	
	Number	% of Total*	Number	% of Total*	Number	% of Total*
Completed Applications (1)	6,497,003	n/a	2,569,610	n/a	3,927,393	n/a
Number of Individuals Applying for Coverage in Completed Applications (1)	11,485,366	100.0%	5,396,996	100.0%	6,088,370	100.0%
Eligible for Marketplace Plan Enrollment	7,267,230	63.3%	2,488,288	46.1%	4,778,942	78.5%
Eligible for Marketplace Plan with Financial Assistance (non-add)	4,156,600	36.2%	1,457,709	27.0%	2,698,891	44.3%
Other Marketplace Plan-Eligible Individuals (non-add)	3,110,630	27.1%	1,030,579	19.1%	2,080,051	34.2%
Determined or Assessed Eligible for Medicaid/CHIP by the Marketplace	3,181,155	27.7%	2,013,145	37.3%	1,168,010	19.2%
Pending/Other	1,089,106	9.5%	947,688	17.6%	141,418	2.3%
Total Individuals Eligible to Enroll in a Marketplace Plan	7,267,230	100.0%	2,488,288	100.0%	4,778,942	100.0%
Marketplace Eligible Individuals Who Have Selected a Marketplace Plan	3,299,492	45.4%	1,359,904	54.7%	1,939,588	40.6%

(1) We are no longer showing data on the total number of completed applications and total number of individuals applying for coverage in completed applications in Appendix C and in the main body of this report because we believe that there is duplication in these metrics.

* Percent of total represents the percent of total individuals applying for coverage in completed applications, or the percent of total individuals eligible to enroll in a Marketplace plan who have selected a Marketplace plan.

** Pending/Other does not sum to 100 percent due to differences in process flows and potentially missing data. (Note: The Pending/Other totals shown in this table represent the sums of the corresponding state-level Pending/Other counts in Appendix B, which may differ slightly from the difference between the total number of individuals applying for coverage in completed applications and the total number of individuals with processed eligibility determinations).

*** Total SBM and FFM data on the number of persons with processed eligibility determinations or assessments do not add to the total number of persons applying for coverage in completed applications due to missing data and differences in process flow for Marketplace plan and Medicaid/CHIP eligibility determinations / assessments.
